# How to Forget a Wireless Connection in Windows 8

Here are the steps to forget the connection settings for a wireless connection in Windows 8.

1. First, point to the lower right corner of the screen to bring up the **charm menu**, and then click on the **Settings** button to open the Windows 8 settings menu.
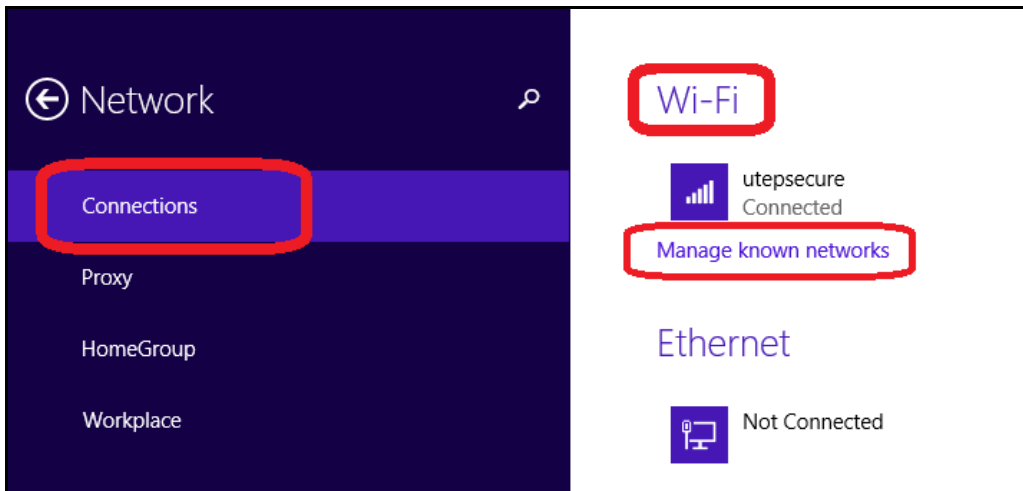

2. When the settings menu comes up, click *Change PC settings* at the bottom of the menu to open the *PC settings* window.

3. In the *PC settings* window, choose *Network* to view the network settings for this PC.

4. Under the **Network** settings, select **Connections** and then click on **Manage known networks** under the **Wi-Fi** section to manage the wireless connections.

5. Under the **Manage known networks** window, choose the network that you want to forget. For UTEP's wireless network, the network name should be **utepsecure**. Click on the network name to select it, and then click on the **Forget** button to forget it.
