# How to Forget a Wireless Connection in macOS / OS X

Here are the steps to forget the connection settings for a wireless connection in macOS / OS X.
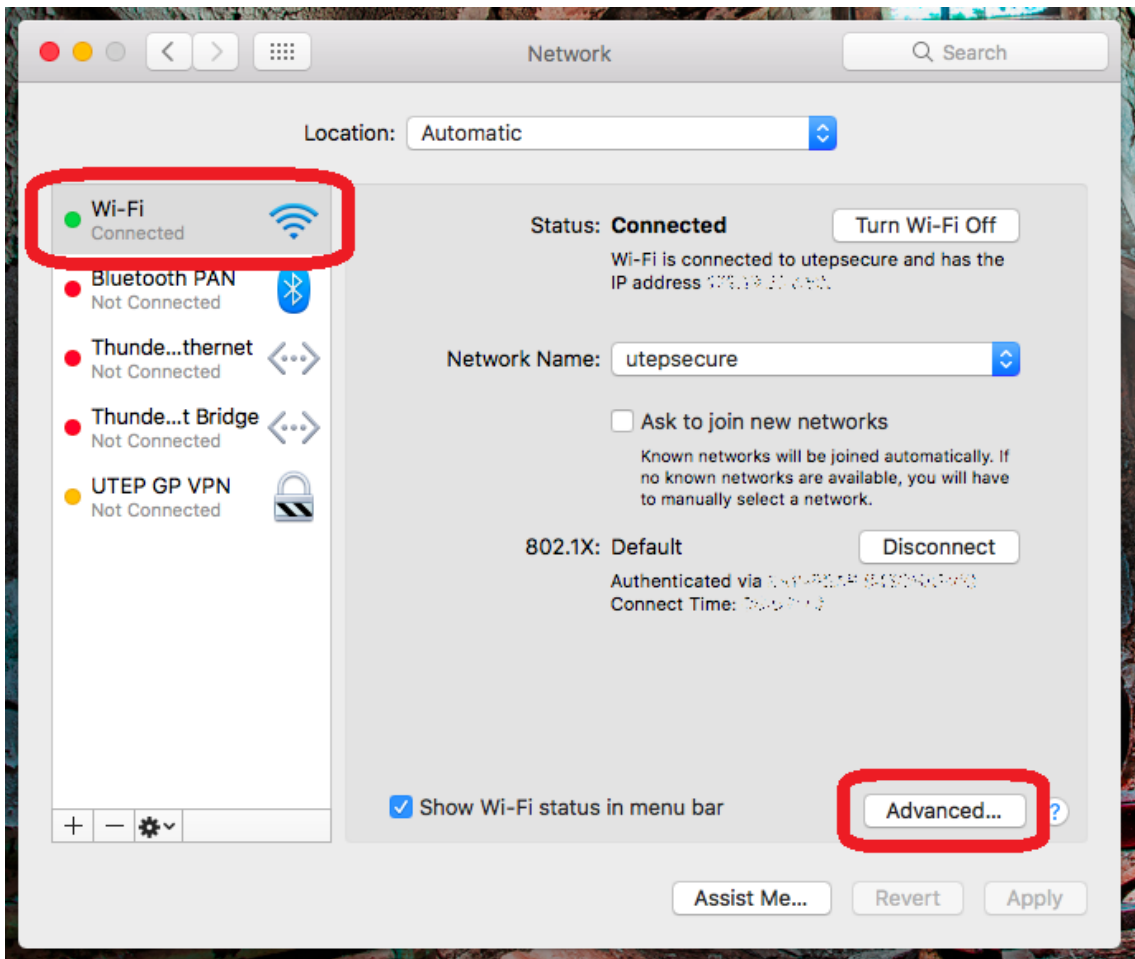

1. First, open the **System Preferences** window by clicking the **apple icon** at the top left.

2. Next, click on **Network** to view the network settings window.

3. Now select the wireless connection by choosing **Wi-Fi** from the connection list in the left column and then open the advanced settings window by clicking on the **Advanced...** button.

4. Under the advanced wireless settings, choose the network that you want to forget. For UTEP's wireless network, the network name should be ***utepsecure***. Click on the network name to select it, and then click on the ' **–** ' sign to forget it.
