New Frontiers for Assessing Clinical Reasoning

*Presented by:* Steven J. Durning, MD, PhD

Friday September 22, 2017, 4:00 pm-6:00 pm
UTEP Campbell Building Room 115

*Sponsored by*
Senior Rehab Solutions

*Continuing Education Credit is pending for PT, OT, and SLP*

**Course Description:** Clinical reasoning is a complex process that is essential to patient care. Assessing clinical reasoning is challenging for a number of reasons to include difficulties in directly observing internal mental processes, variation in physician performance from situation to situation (context specificity), choosing relevant theories for assessment, and the assumed linear nature of this complex process.

**About the Instructor:**
Steven J. Durning, MD, PhD is a professor of medicine and pathology at the Uniformed Services University (USU). He received his MD degree from the University of Pittsburgh and he practices general internal medicine. He received his PhD from Maastricht University, which addressed the influence of contextual factors on clinical reasoning. Dr. Durning currently oversees a second year medical student course on clinical reasoning. In addition to serving as a course director, he is the director of the newly established Masters and PhD in Health Professions Education at USU and is the principal investigator of USU’s Long Term Career Outcome Study. Dr. Durning serves on a number of national and international organizations and research interests include clinical reasoning and assessment.

**Objectives:** Participants should be able to:

- Discuss two contemporary theories for approaching clinical reasoning
- Explore emerging assessment modalities for assessing clinical reasoning
- Discuss potential avenues for future research
REGISTRATION INFORMATION

Participants must register online no later than midnight on September 21 at:
https://secure.touchnet.net/C21711_ustores/web/store_main.jsp?STOREID=25&SINGLESTORE=true

SEE DISCOUNT CODES BELOW

There is no mechanism to refund the discount in the event a participant registers accidentally under the full price. It is important that the correct amount for registration is shown before hitting submit.

NO ONSITE REGISTRATION WILL BE ACCEPTED*
* There is 1 exception to onsite registration. Individuals with DPT CCU coupons, please send your registration information to bscarborough@utep.edu to reserve a seat. Bring your DPT CCU coupons and register on-site the day of the course.
