Description of Business Taxes in the State of New Mexico Gross Receipts

The Gross Receipts are the total amount of money or value of other consideration received from:

- Sales of tangible personal property handled on consignment
- Commissions received
- Amounts paid by members of any cooperative association
- Amounts received by persons providing telephone or telegraph services
- Fees received by persons for serving as disclosed agents for another
- Amounts received by a New Mexico florist from the sale of flowers, plants, etc., that are filled and delivered outside New Mexico by an out-of-state florist
- Providing intrastate mobile telecommunications services (i.e., the services originate and terminate in the same state) to customers whose place of primary use is in New Mexico

Wage Withholding Tax

Employers must withhold a part of the employee's wages for payment of income tax. New Mexico bases its withholding tax on an estimate of an employee's State income tax liability. The State credits taxes withheld against the employee's actual income tax liability on the New Mexico personal income tax return. State withholding tax is like federal withholding tax.

Amount to be withheld

The amount of tax withheld may vary depending on how many allowances an employee claims on the federal W-4 form and how often wages are paid. Employers should refer to the New Mexico State Wage Withholding Tables located in the FYI-104 to determine the proper amount to withhold.

Compensation Tax

The compensating tax is imposed at a rate of 5.125% on certain property used in New Mexico and 5% on certain services used in New Mexico. Compensating tax is reported on a Combined Reporting System (CRS) form and is due on or before the 25th day of the month following the report period in which the taxable transaction occurs.

Corporate Income Tax

New Mexico imposes its corporate income tax on the net income of every domestic corporation and every foreign corporation that: Is employed or engaged in the transaction of business in, into, or from this state, or has income from property or employment within this state.

"Net income" generally is federal taxable income adjusted to exclude amounts not taxable by states.

Franchise Tax

New Mexico Corporate Franchise Tax is the obligation of every domestic and foreign corporation, including S corporations, that either engages in business in New Mexico or exercises its corporate franchise in this state, whether actively engaged in business or not.

Workers' Compensation

The fee is not the same as the workers' compensation insurance premium. Paying the fee does not mean that the employer has workers' compensation insurance coverage. The employer must obtain a workers' compensation insurance policy.

The fee for the employer is \$2.30 times the number of covered employees working on the last day of the quarter. The fee for covered employees working on the last day of the quarter is \$2.00. Payment is due by the last day of the month following the end of the quarter.

The revenue from these fees goes to the state treasurer to be deposited in the Workers' Compensation Administration Fund, of which \$.30 per employee of the fee assessed against the employer reaches the Uninsured Employers' Fund.
