The University of Texas at El Paso

Dr. Martine Ceberio is a Professor of Computer Science at The University of Texas at El Paso. She joined UTEP in 2003 after obtaining her Ph.D. in Computer Science from the University of Nantes, France (2003). Her research revolves around reliable decision-making under uncertainty, optimization, constraint solving, solving dynamical systems, and using neural networks with uncertainty. She is passionate about teaching and mentoring students. She is a fierce advocate of her students' success and seizes every opportunity to provide advice and mentoring. Her other passion is in broadening participation in Computer Science and fostering cultures of inclusion. She hosts young women high-school students as research interns in her research lab to introduce them to computing in summers.
