

# TINY TUNNELS

## BIG CONNECTIONS

ANT RELATIONSHIPS SHAPE THE WORLD

### ANT PARTS WORD SEARCH

Ant anatomy is diverse and can look very different from across species, but all ants have the same parts. Ants can be identified quickly from other insects by two traits: they have a waist called a *petiole* and *antennae* that are elbowed. Search horizontally, vertically, and diagonally to find the hidden words below.

ABDOMEN    ANTENNA    FEMUR    PETIOLE    THORAX    STING  
HEAD    TARSUS    GASTER    TIBIA    TROCHANTER
