Summer Tech Camps for Kids

Camp Details

Artificial Intelligence Camp

Session 1: June 22-26, 2026
Session 2: July 6-10, 2026

Join our one-week AI Summer Camp for rising middle and high school students and explore the exciting world of Artificial Intelligence! Learn the basics of Python, develop algorithms, and build hands-on projects like image classifiers and recommendation systems. The camp also features guest speakers from academia and industry who will share insights into real-world AI applications and careers. No experience needed—just curiosity and a passion for tech

Cybersecurity Camp

Session 1: June 15-18 Beginner
Session 2: July 20-24 Beginner
Session 3: July 27-31 Advanced

Students will receive 20-40 hours of cybersecurity training from UTEP Cybersecurity students provided by the American Air Force (AFA) CyberPatriot Team. Each camp consists of two weeks. During the first week, students will learn beginner cybersecurity skills, and those who complete week one will transition to the second week to learn advanced skills
