BASIC PLAN

I. AUTHORITY

A. Federal

1. Robert T. Stafford Disaster Relief & Emergency Assistance Act, (as amended), 42 U.S.C. 5121
2. Emergency Planning and Community Right-to-Know Act, 42 USC Chapter 116
3. Emergency Management and Assistance, 44 CFR
8. National Incident Management System
9. National Response Plan
11. Nuclear/Radiological Incident Annex of the National Response Plan

B. State

1. Government Code, Chapter 418 (Emergency Management)
2. Government Code, Chapter 421 (Homeland Security)
3. Government Code, Chapter 433 (State of Emergency)
4. Government Code, Chapter 791 (Inter-local Cooperation Contracts)
5. Health & Safety Code, Chapter 778 (Emergency Management Assistance Compact)
7. Executive Order of the Governor Relating to the National Incident Management System
8. Administrative Code, Title 37, Part 1, Chapter 7 (Division of Emergency Management)

C. Local

1. The University of Texas System (UT System) Board of Regents Rules
2. The UT System Policy 174, Environmental Health and Safety: Risk Assessment Guidelines
3. The UT System Policy 172, Emergency Management
4. The UT System Policy 813 Emergency Notifications and Timely Warnings
5. UT System Policy 807, Civil Disorder/Disturbance Management
6. The UT System Policy 165, System Information Resources Use and Security Policy
8. The University of Texas at El Paso (UTEP) Police Department General Order 222, Active Shooter/Barricaded Suspect
9. UTEP Police Department General Order 408, Medical Emergencies
10. Intra-local Agreements & Contracts. See the summary in Attachment 5.
II. PURPOSE

This Basic Plan outlines the University of Texas at El Paso (UTEP) approach to emergency operations. The plan provides general guidance for emergency management activities and an overview of UTEP’s methods of mitigation, preparedness, response, and recovery. The plan describes UTEP’s emergency response organization and assigns responsibilities for various emergency tasks. This plan applies to all University officials, departments, and agencies. The primary audience for the document includes our University President, Vice-Presidents’, Executive Policy Group, University Police Department, City/County of El Paso elected officials, the emergency management staff, department and agency heads and their senior staff members, leaders of local volunteer organizations that support emergency operations, and others who may participate in our mitigation, preparedness, response, and recovery efforts.

This Emergency Management Plan (EMP) is intended to establish policies, procedures and organizational structure for response to emergencies that are of sufficient magnitude to cause a significant disruption of the functioning of all or portions of the University of Texas at El Paso. This plan describes the roles and responsibilities of departments, schools, units and personnel during emergency situations. The basic emergency procedures are designed to protect lives and property through effective use of university and community resources. Since an emergency may be sudden and without warning, these procedures are designed to be flexible in order to accommodate contingencies of various types and magnitudes.

B. Definitions

1. **Area Command (Unified Area Command).** An organization established (1) to oversee the management of multiple incidents that are each being managed by an ICS organization or (2) to oversee the management of large or multiple incidents to which several Incident Management Teams have been assigned. Sets overall strategy and priorities, allocates critical resources according to priorities, ensures that incidents are properly managed, and ensures that objectives are met and strategies followed. Area Command becomes Unified Area Command when incidents are multijurisdictional.

2. **Disaster District.** Disaster Districts are regional state emergency management organizations mandated by the Executive Order of the Governor relating to Emergency Management whose boundaries parallel those of Highway Patrol Districts and Sub-Districts of the Texas Department of Public Safety.

3. **Disaster District Committee.** The DDC consists of a Chairperson (the local Highway Patrol captain or command lieutenant), and agency representatives that mirror the membership of the State Emergency Management Council. The DDC Chairperson, supported by committee members, is responsible for identifying, coordinating the use of, committing, and directing state resources within the district to respond to emergencies.

4. **Emergency Operations Center.** Specially equipped facilities from which government officials exercise direction and control and coordinate necessary resources in an emergency situation.

5. **Public Information.** Information that is disseminated to the public via the news media before, during, and/or after an emergency or disaster.

6. **Emergency Situations.** As used in this plan, this term is intended to describe a range of occurrences, from a minor incident to a catastrophic disaster. It includes the following:

   a. **Incident.** An incident is a situation that is limited in scope and potential effects. Characteristics of an incident include:

      1) Involves a limited area and/or limited population.
      2) Evacuation or in-place sheltering is typically limited to the immediate area of the incident.
      3) Warning and public instructions are provided in the immediate area, not community-wide.
4) One or two local response agencies or departments acting under an incident commander normally handle incidents. Requests for resource support are normally handled through agency and/or departmental channels.

5) May require limited external assistance from other local response agencies or contractors.

6) For the purposes of the NRF, incidents include the full range of occurrences that require an emergency response to protect life or property.

b. Emergency. An emergency is a situation that is larger in scope and more severe in terms of actual or potential effects than an incident. Characteristics include:

1) Involves a large area, significant population, or important facilities.
2) May require implementation of large-scale evacuation or in-place sheltering and implementation of temporary shelter and mass care operations.
3) May require community-wide warning and public instructions.
4) Requires a sizable multi-agency response operating under an incident commander.
5) May require some external assistance from other local response agencies, contractors, and limited assistance from state or federal agencies.
6) The EOC will be activated to provide general guidance and direction, coordinate external support, and provide resource support for the incident.
7) For the purposes of the NRF, an emergency (as defined by the Stafford Act) is “any occasion or instance for which, in the determination of the President, Federal assistance is needed to supplement State and local efforts and capabilities to save lives and to protect property and public health and safety, or to lessen or avert the threat of catastrophe in any part of the United States.”

c. Disaster. A disaster involves the occurrence or threat of significant casualties and/or widespread property damage that is beyond the capability of the local government to handle with its organic resources. Characteristics include:

1) Involves a large area, a sizable population, and/or important facilities.
2) May require implementation of large-scale evacuation or in-place sheltering and implementation of temporary shelter and mass care operations.
3) Requires community-wide warning and public instructions.
4) Requires a response by all local response agencies operating under one or more incident commanders.
5) Requires significant external assistance from other local response agencies, contractors, and extensive state or federal assistance.
6) The EOC will be activated to provide general guidance and direction, provide emergency information to the public, coordinate state and federal support, and coordinate resource support for emergency operations.
7) For the purposes of the NRF, a major disaster (as defined by the Stafford Act) is any catastrophe, regardless of the cause, which in the determination of the President causes damage of sufficient severity and magnitude to warrant major disaster federal assistance.

d. Catastrophic Incident. For the purposes of the NRP, this term is used to describe any natural or manmade occurrence that results in extraordinary levels of mass casualties, property damage, or disruptions that severely affect the population, infrastructure,
environment, economy, national morale, and/or government functions. An occurrence of this magnitude would result in sustained national impacts over prolonged periods of time, and would immediately overwhelm local and state capabilities. All catastrophic incidents are Incidents of National Significance.

7. **Hazard Analysis.** A document, published separately from this plan that identifies the local hazards that have caused or possess the potential to adversely affect public health and safety, public or private property, or the environment.

8. **Hazardous Material (HAZMAT).** A substance in a quantity or form posing an unreasonable risk to health, safety, and/or property when manufactured, stored, or transported. The substance, by its nature, containment, and reactivity, has the capability for inflicting harm during an accidental occurrence. Is toxic, corrosive, flammable, reactive, an irritant, or a strong sensitizer, and poses a threat to health and the environment when improperly managed. Includes toxic substances, certain infectious agents, radiological materials, and other related materials such as oil, used oil, petroleum products, and industrial solid waste substances.

9. **Incident of National Significance.** An actual or potential high-impact event that requires a coordinated and effective response by and appropriate combination of federal, state, local, tribal, nongovernmental, and/or private sector entities in order to save lives and minimize damage, and provide the basis for long-term communication recovery and mitigation activities.

10. **Inter-local agreements.** Arrangements between governments or organizations, either public or private, for reciprocal aid and assistance during emergency situations where the resources of a single jurisdiction or organization are insufficient or inappropriate for the tasks that must be performed to control the situation. Commonly referred to as mutual aid agreements.

11. **Stafford Act.** The Robert T. Stafford Disaster Relief and Emergency Assistance Act authorizes federal agencies to undertake special measures designed to assist the efforts of states in expediting the rendering of aid, assistance, emergency services, and reconstruction and rehabilitation of areas devastated by disaster.

12. **Standard Operating Procedures.** Approved methods for accomplishing a task or set of tasks. SOPs are typically prepared at the department or agency level. May also be referred to as Standard Operating Guidelines (SOGs).

### IV. SITUATION AND ASSUMPTIONS

**A. Situation**

This plan is a university-level plan that guides the emergency response of university personnel and resources during an emergency situation. It is the official emergency response plan of the University and precludes actions not in concert with the intent of this plan or the organization created by it.

*However, nothing in this plan shall be construed in a manner that limits the use of good judgment*
and common sense in matters not foreseen or covered by the elements of the plan.

This plan and organization shall be subordinate to federal, state or local plans during a disaster declaration by those authorities. This Emergency Management Plan is consistent with established practices relating to coordination of emergency response. Accordingly, this plan incorporates the use of the National Incident Management System (NIMS) to facilitate interagency coordination, promote the use of common emergency response terminology and command structure, and facilitate the flow of information between responding agencies (Paragraph F).

The UTEP community is exposed to many hazards, all of which have the potential for disrupting the community, causing casualties, and damaging or destroying public or private property. A summary of UTEP’s major hazards is provided in figure 1. More detailed information is provided in UTEP’s hazard analysis, published separately.

* Likelihood of Occurrence: Unlikely, Occasional, Likely, or Highly Likely

**B. Assumptions**

1. The University of Texas at El Paso will cooperate with FEMA, Department of Homeland Security, the Texas Department of Emergency Management, the El Paso City/County
Office of Emergency Management and other responders in the development of emergency response plans and participate in multi-jurisdictional emergency planning exercises.

2. The UTEP Community will continue to be exposed to and subject to the impact of those hazards described above and as well as lesser hazards and others that may develop in the future.

3. It is possible for a major disaster to occur at any time and at any place. In many cases, dissemination of warning to the public and implementation of increased readiness measures may be possible. However, some emergency situations occur with little or no warning.

4. Outside assistance will be available in most emergency situations, affecting the UTEP Community. Since it takes time to summon external assistance, it is essential for us to be prepared to carry out the initial emergency response on an independent basis.

5. Proper mitigation actions, such as flood management, lab safety and fire inspections, help to mitigate incidents from occurring. Detailed emergency planning, training of emergency responders and other personnel, and conducting periodic emergency drills and exercises can improve our readiness to deal with emergency situations.

6. The succession of events in an emergency or a disaster is not predictable; therefore, published operational plans, such as this plan, should serve only as a guide and a checklist, and may require modifications in order to meet the requirements of the emergency.

V. CONCEPT OF OPERATIONS

A. Objectives

The objectives of UTEP’s emergency management program are to protect public health and safety and preserve public and private property. The University will respond to an emergency situation in a safe, effective and timely manner. University personnel and equipment will be utilized to accomplish the following priorities:

a. Priority I: Protection of Human Life
b. Priority II: Protection of University Assets
c. Priority III: Restoration of General Campus Operations

B. General

a. It is UTEP’s responsibility to protect public health and safety and preserve property from the effects of hazardous events. UTEP has the primary role in identifying and mitigating hazards, preparing for and responding to, and managing the recovery from emergency situations that affect the UTEP community.
b. It is impossible for the University to do everything that is required to protect the lives and property of its population. Individuals within the UTEP Community have the responsibility to prepare themselves and their families to cope with emergency situations and manage their affairs in ways that will aid the University in managing emergencies. UTEP will assist its community in carrying out these responsibilities by providing public information and instructions prior to and during emergency situations.

c. Local government is responsible for organizing, training, and equipping local emergency responders and emergency management personnel, providing appropriate emergency facilities, providing suitable warning and communications systems, and for contracting for emergency services. The state and federal governments offer programs that provide some assistance with portions of these responsibilities. UTEP provides mitigation activities to include: Fire Inspection as per the Life Safety Code, Property Protection Programs, Community Emergency Response Team training, fire drills, emergency pre-planning, Fire Safety training, blood-borne pathogen training, asbestos awareness, and hazardous waste operations from laboratory activities.

d. To achieve UTEP’s objectives, the University has organized an emergency management program that integrates both local and campus wide resources to address protection, mitigation, preparedness, response, and recovery. This plan is one element of UTEP’s preparedness activities.

e. This plan is based on an all-hazard approach to emergency management. It addresses general functions that may need to be performed during any emergency situation and is not a collection of plans for specific types of incidents. For example, the warning appendix addresses techniques that can be used to warn the public during any emergency situation, whatever the cause.

f. Academic Departments and all other entities tasked in this plan are expected to develop and keep current standard operating procedures that describe how emergency tasks will be performed.

g. This plan is based upon the concept that the emergency functions that must be performed by many and are generally parallel to some of their normal day-to-day functions. To the extent possible, the same personnel and material resources used for day-to-day activities will be employed during emergency situations. Because personnel and equipment resources are limited, some routine functions that do not contribute directly to the emergency may be suspended for the duration of an emergency. The personnel, equipment, and supplies that would normally be required for those functions will be redirected to accomplish emergency tasks.

h. UTEP has adopted the National Incident Management System (NIMS) in accordance with the President’s Homeland Security Directive (HSPD)-5. UTEP’s adoption of NIMS will provide a consistent approach to the effective management of situations involving natural or man-made disasters, or terrorism. NIMS allows UTEP to integrate its response activities using a set of standardized organizational
structures designed to improve interoperability between all levels of government, private sector, and nongovernmental organizations.

i. This plan, in accordance with the National Response Framework (NRF), is an integral part of the national effort to prevent, and reduce America’s vulnerability to terrorism, major disasters, and other emergencies, minimize the damage and recover from attacks, major disasters, and other emergencies that occur. In the event of an Incident of National Significance, as defined in HSPD-5, UTEP will integrate all operations with all levels of government, private sector, and nongovernmental organizations through the use of NRP coordinating structures, processes, and protocols.

A. Operational Guidance

UTEP will employ the six components of the NIMS in all operations, which will provide a standardized framework that facilitates operations in all phases of emergency management. Attachment 6 provides further details on the NIMS.

1. Initial Response. UTEP’s emergency responders are likely to be the first on the scene of an emergency situation. They will normally take charge and remain in charge of the incident until it is resolved or others who have legal authority to do so assume responsibility. They will seek guidance and direction from UTEP Police Department, Emergency Management personnel, and seek technical assistance from state and federal agencies and industry where appropriate.

2. Implementation of ICS

a. The first local emergency responder to arrive at the scene of an emergency situation will implement the incident command system and serve as the incident commander until relieved by a more senior or more qualified individual. The incident commander may establish an incident command post (ICP) and provide an on-scene report to local officials, identify response resources required, and direct the on-scene response from the ICP.

b. For some types of emergency situations, prior to any potential harm, the EOC may accomplish initial response actions, such as mobilizing personnel and equipment and issuing precautionary warning to the public. As the potential threat becomes clearer and a specific impact site or sites identified, an incident command post may be established, and direction and control of the response transitioned to the Incident Commander.

3. Source and Use of Resources.

a. UTEP will use its own resources, all of which meet the requirements for resource management in accordance with the NIMS, to respond to emergency situations, purchasing supplies and equipment if necessary, and request assistance if UTEP’s resources are insufficient or inappropriate. The UT System Disaster Response Mutual Aid Guidebook provides that the University of Texas System should
be the first channel through which UTEP requests assistance when its resources are exceeded.

1) Summon those resources available to UTEP pursuant to both the UT System Mutual Aid Agreement and inter-local agreements. See Attachment 5 to this plan, which summarizes the University's Mutual Aid Agreements/Memorandums of Understanding and identifies the officials authorized to request those resources.

2) Summon emergency service resources that we have contracted for. See Attachment 5.

3) Request assistance from volunteer groups active in disasters.

4) Request assistance from industry or individuals who have resources needed to deal with the emergency situation.

When external agencies respond to an emergency situation within UTEP, it is expected that these agencies conform to the guidance and direction provided by the incident commander, which will be in accordance with the NIMS.

4. Incident Command System (ICS)

A. UTEP intends to employ ICS, an integral part of the NIMS, in managing emergencies. ICS is both a strategy and a set of organizational arrangements for directing and controlling field operations. It is designed to effectively integrate resources from different agencies into a temporary emergency organization at an incident site that can expand and contract with the magnitude of the incident and resources on hand.

B. An incident commander using response resources from one or two departments or agencies can handle the majority of emergency situations. Departments or agencies participating in this type of incident response will normally obtain support through their own department or agency.

C. In emergency situations where other jurisdictions or the state or federal government are providing significant response resources or technical assistance, it is generally desirable to transition from the normal ICS structure to a Unified or Area Command structure. This arrangement helps to ensure that all participating agencies are involved in developing objectives and strategies to deal with the emergency. Attachment 6 provides additional information on Unified and Area Commands.

5. ICS - EOC Interface

A. For major emergencies and disasters, UTEP’s Emergency Operations Center (EOC) may be activated. When the EOC is activated, it is essential to establish a division of responsibilities between the incident command post and the EOC. A general division of responsibilities is outlined below. It is essential that a precise division of responsibilities be determined for specific emergency operations.

1. The incident commander is generally responsible for field operations, including:

   a. Isolating the scene.
   b. Directing and controlling the on-scene response to the emergency situation and managing the emergency resources committed there.
   c. Warning the population in the area of the incident and providing emergency instructions to them.
d. Determining and implementing protective measures (evacuation or in-place sheltering) for the population in the immediate area of the incident and for emergency responders at the scene.

e. Implementing traffic control arrangements in and around the incident scene.

f. Requesting additional resources from the EOC.

2. The EOC is generally responsible for:

a. Providing resource support for the incident command operations.

b. Issuing community-wide warning.

c. Issuing instructions and providing information to the general public.

d. Organizing and implementing large-scale evacuation.

e. Organizing and implementing shelter and mass arrangements for evacuees.

f. Coordinating traffic control for large-scale evacuations.

g. Requesting assistance from local, State, and other external sources.

3. In some large-scale emergencies or disasters, emergency operations with different objectives may be conducted at geographically separated scenes. In such situations, more than one incident command operation may be established. If this situation occurs, a transition to an Area Command or a Unified Area Command is desirable, and the allocation of resources to specific field operations will be coordinated through UTEP’s EOC.

F. State, Federal & Other Assistance

1. State & Federal Assistance

a. If local resources are inadequate to deal with an emergency situation, we will request assistance from the State. State assistance furnished to State Universities is intended to supplement local resources and not substitute for such resources, including mutual aid resources, equipment purchases or leases, or resources covered by emergency service contracts.

b. Requests for state assistance should be made to the District Coordinator, Field Response DDC 08, who then reports the request to the Disaster District Committee (DDC) Chairperson, located at the Department of Public Safety District Office in El Paso. In essence, state emergency assistance begins at the DDC level and the key person to validate a request for, obtain, and provide that state assistance and support is the DDC Chairperson. A request for state assistance must be made by the University President or designee and may be made by telephone, fax, or teletype. The DDC Chairperson has the authority to utilize all state resources within the district to respond to a request for assistance, with the exception of the National Guard. Use of National Guard resources requires approval of the Governor.

c. The Disaster District staff will forward requests for assistance that cannot be satisfied by state resources within the District to the State Operations Center (SOC) in Austin for response.

2. Other Assistance
a. If resources required to control an emergency situation are not available within the State, the Governor may request assistance from other states pursuant to a number of interstate compacts or from the federal government through the Federal Emergency Management Agency (FEMA).

b. For major emergencies and disasters for which a Presidential declaration has been issued, federal agencies may be mobilized to provide assistance to states and local governments. The National Response Framework (NRF) describes the policies, planning assumptions, concept of operations, and responsibilities of designated federal agencies for various response and recovery functions. The Nuclear/Radiological Incident Annex of the NRF addresses the federal response to major incidents involving radioactive materials.

c. FEMA has the primary responsibility for coordinating federal disaster assistance. No direct federal disaster assistance is authorized prior to a Presidential emergency or disaster declaration, but FEMA has limited authority to stage initial response resources near the disaster site and activate command and control structures prior to a declaration and the Department of Defense has the authority to commit its resources to save lives prior to an emergency or disaster declaration.

d. The NRF applies to Stafford and non-Stafford Act incidents and is designed to accommodate not only actual incidents, but also the threat of incidents. Therefore, NRF implementation is possible under a greater range of incidents.

G. Emergency Authorities for the Jurisdiction in which UTEP resides

1. Key federal, state, and local legal authorities pertaining to emergency management are listed in Section I of this plan.

Texas statutes and the Executive Order of the Governor Relating to Emergency Management provide local government, principally the chief elected official, with a number of powers to control emergency situations. If necessary, the City/County of El Paso shall use these powers during emergency situations. These powers include:

a. Emergency Declaration. In the event of riot or civil disorder, the County Judge may request the Governor to issue an emergency declaration for this jurisdiction and take action to control the situation.

b. Disaster Declaration. When an emergency situation has caused severe damage, injury, or loss of life or it appears likely to do so, the County Judge may by executive order or proclamation declare a local state of disaster. The County Judge may subsequently issue orders or proclamations referencing that declaration to invoke certain emergency powers granted the Governor in the Texas Disaster Act on an appropriate local scale in order to cope with the disaster. These powers include:

1) Suspending procedural laws and rules to facilitate a timely response.
2) Using all available resources of government and commandeering private property, subject to compensation, to cope with the disaster.
3) Restricting the movement of people and occupancy of premises.
4) Prohibiting the sale or transportation of certain substances.
5) Implementing price controls.

A local disaster declaration activates the recovery and rehabilitation aspects of this plan. A local disaster declaration made by the County Judge is required to obtain state and federal disaster recovery assistance.

c. Authority for Evacuations. State law provides a county judge or mayor with the authority to order the evacuation of all or part of the population from a stricken or threatened area within their respective jurisdictions.

Actions by Phases of Emergency Management

1. This plan addresses emergency actions that are conducted during all four phases of emergency management.

   a. Mitigation

       UTEP will conduct mitigation activities as an integral part of its emergency management program. Mitigation is intended to eliminate hazards, reduce the probability of hazards causing an emergency situation, or lessen the consequences of unavoidable hazards. Mitigation should be a pre-disaster activity, although mitigation may also occur in the aftermath of an emergency situation with the intent of avoiding repetition of the situation.

   b. Preparedness

       UTEP will conduct preparedness activities to develop the response capabilities needed in the event an emergency. Among the preparedness activities included in UTEP's emergency management program are:

       1) Providing emergency equipment and facilities.
       2) Emergency planning, including maintaining this plan, its appendices, and appropriate SOPs.
       3) Conducting or arranging appropriate training for emergency responders, emergency management personnel, faculty, staff, students, and volunteer groups who may assist UTEP during emergencies.
       4) Conducting periodic drills and exercises to test UTEP’s plans and training.

   c. Response

       UTEP will respond to emergency situations effectively and efficiently. The focus of most of this plan and its appendices is on planning for the response to emergencies. Response operations are intended to resolve an emergency situation while minimizing casualties and property damage. Response activities for UTEP include warning, law enforcement operations, evacuation, shelter, emergency public information, as well as other associated functions.

   d. Recovery
If a disaster occurs, UTEP will carry out a recovery program that involves both short-term and long-term efforts. Short-term operations seek to restore vital services to the community and provide for the basic needs of the public. Long-term recovery focuses on restoring the UTEP community to its normal state. The federal government, pursuant to the Stafford Act, provides the vast majority of disaster recovery assistance. The recovery process includes assistance to individuals, businesses, and public institutions. Examples of recovery programs include restoration of services, debris removal, restoration of utilities, disaster mental health services, and reconstruction of damaged roads and bridges.

VI. ORGANIZATION AND ASSIGNMENT OF RESPONSIBILITIES

A. Organization

1. General

Some departments within the University have emergency functions in addition to their normal day-to-day duties. During emergency situations, UTEP’s normal organizational arrangements are modified to facilitate emergency operations. The University's organization for emergencies includes: an executive group, law enforcement, environmental health and safety responders, emergency management, and support services. Attachment 3 depicts our emergency organization.

2. Executive Group

The Executive Group provides guidance and direction for emergency management programs and for emergency response and recovery operations. The Executive Group includes the University President, Executive Vice President, Chief of Police, Associate Vice President of Environmental Health & Services, Office of the Provost, and the Emergency Management Coordinator(s).

3. Emergency Services

Emergency Services include the Incident Commander and those departments, agencies, and groups with primary emergency response actions. The incident commander is the person in charge at an incident site.

4. Emergency Support Services

This group includes departments and agencies that support and sustain emergency responders and also coordinate emergency assistance provided by organized volunteer organizations, business and industry, and other sources.

5. UTEP Community Emergency Response Team Volunteers

This group includes organized volunteers that have agreed to provide certain support for emergency operations, if able to do so.
B. Assignment of Responsibilities

1. General

For most emergency functions, successful operations require a coordinated effort from a number of departments, agencies, and groups. To facilitate a coordinated effort, elected and appointed officials, departments and agency heads, and other personnel are assigned primary responsibility for planning and coordinating specific emergency functions. Generally, primary responsibility for an emergency function will be assigned to an individual from the department or agency that has legal responsibility for that function or possesses the most appropriate knowledge and skills. Other officials, departments, and agencies may be assigned support responsibilities for specific emergency functions. Attachment 4 summarizes the general emergency responsibilities of local officials, department and agency heads, and other personnel.

2. The individual having primary responsibility for an emergency function is normally responsible for coordinating preparation of and maintaining that portion of the emergency plan that addresses that function. Listed below are general responsibilities assigned to the Executive Group, Emergency Services, Support Services, and other Support Agencies.

3. Executive Group Responsibilities

a. UTEP’s President’s Office and Office of Emergency Management will:

1) Establish objectives and priorities for the emergency management program and provide general policy guidance on the conduct of that program.
2) Monitor the emergency response during disaster situations and provides direction where appropriate.
3) With the assistance of the Public Information Officer, keep the public informed during emergency situations.
4) With the assistance of the legal staff declare a local state of disaster.
5) Request assistance from the UT System, local government, or the State when necessary.
6) Direct activation of the EOC.

b. The University of Texas at El Paso’s Office of Emergency Management will:

1) Implement the policies and decisions of UTEP relating to emergency management.
2) Organize the emergency management program and identifies personnel, equipment, and facility needs.
3) Assign emergency management program tasks to departments and agencies.
4) Ensure that departments and agencies participate in emergency planning, training, and exercise activities.
5) Coordinate the operational response of local emergency services.
6) Coordinate activation of the EOC and supervise its operation.

c. The Emergency Management Coordinator will:
1) Serve as the staff advisor to UTEP’s Executive Vice President on emergency management matters.
2) Keep the Office of the President body apprised of our preparedness status and emergency management needs.
3) Coordinate local planning and preparedness activities and the maintenance of this plan.
4) Prepare and maintain a resource inventory.
5) Arrange appropriate training for local emergency management personnel and emergency responders.
6) Coordinate periodic emergency exercises to test our plan and training.
7) Manage the EOC, develop procedures for its operation, and conduct training for those who staff it.
8) Activate the EOC when required.
9) Perform day-to-day liaison with the state emergency management staff and other local emergency management personnel.

4. Common Responsibilities

All emergency services and support services will:

a. Provide personnel, equipment, and supplies to support emergency operations upon request.

b. Develop and maintain SOPs for emergency tasks.

c. Provide trained personnel to staff the incident command post and EOC and conduct emergency operations.

d. Provide current information on emergency resources for inclusion in the Resource List.

e. Report information regarding emergency situations and damage to facilities and equipment to the Incident Commander or the EOC.

5. Emergency Services Responsibilities

a. The Incident Commander will:

1) Manage emergency response resources and operations at the incident site command post to resolve the emergency situation.

2) Determine and implement required protective actions for response personnel and the public at an incident site.

b. Warning.

1) Primary responsibility for this function is assigned to UTEP’s Office of Emergency Management who will prepare and maintain this plan and supporting SOPs.
2) Emergency tasks to be performed include:
   
a) Receive information on emergency situations.
   b) Alert key local officials of emergency situations.
   c) Disseminate warning information and instructions to the public through available warning systems.

c. Communications.
   
1) Primary responsibility for this function is assigned to UTEP’s Office of Emergency Management who will prepare and maintain Communications plan and supporting SOPs.

2) Emergency tasks to be performed include:
   
a) Identify the communications systems available with the local area and determine the connectivity of those systems, and ensure their interoperability.
   b) Develop plans and procedures for coordinated use of the various communications systems available in this jurisdiction during emergencies.
   c) Determine and implement means of augmenting communications during emergencies.

d. Radiological Protection.
   
1) UTEP’s Office of Environmental Health and Safety’s Radiation Safety Program provides institutional support and oversight for the receipt, use, and disposal of radioactive materials, lasers, and X-ray producing equipment, as well as compliance with applicable state and federal regulations.

2) Therefore, the primary responsibility for this function is deferred to the City/County of El Paso Office of Emergency Management who will prepare and maintain Radiological Protection plan and supporting SOPs.

3) Emergency tasks to be performed include:
   
a) Maintain inventory of radiological equipment.
   b) Ensure response forces include personnel with current training in radiological monitoring and decontamination.
   c) Respond to radiological incidents involving radiological materials.
   d) Make notification concerning radiological incidents to state and federal authorities.

e. Evacuation.
   
1) Primary responsibility for this function is assigned to UTEP’s Office of Emergency Management who will prepare and maintain Evacuation plan and supporting SOPs.

2) Emergency tasks to be performed include:
a) Identify areas where evacuation has been or may in the future and determine of population at risk.

b) Perform evacuation planning for known risk areas to include route selection and determination of traffic control requirements.

c) Develop simplified planning procedures for ad hoc evacuations.

d) Determine emergency public information requirements.

e) Perform evacuation planning for special needs facilities (schools, hospitals, nursing homes, and other institutions).

f. Firefighting.

1) Primary responsibility for this function is assigned to the City of El Paso Fire Department who prepares and maintains the City/County of El Paso Annex F (Firefighting), where UTEP does not have the capability/capabilities to support this function.

2) Emergency tasks to be performed include:

   a) Fire prevention activities.
   b) Fire detection and control.
   c) Hazardous material and oil spill response.
   d) Terrorist incident response.
   e) Evacuation support.
   f) Post-incident reconnaissance and damage assessment.
   g) Fire safety inspection of temporary shelters.
   h) Prepare and maintain fire resource inventory.
   i) Coordinate and conduct search and rescue activities.
   j) Identify requirements for specialized resources to support rescue operations.
   k) Coordinate external technical assistance and equipment support for search and rescue operations.

3) UTEP conducts the following activities in support of the Annex:

   a) Fire prevention activities.
   b) Fire detection and control.
   c) Fire safety inspection.
   d) Prepare and maintain fire resource inventory.

g. Law Enforcement.

1) Primary responsibility for this function is assigned to UTEP’s Police Department. The Office of Emergency Management will assist in the preparation and maintenance of Law Enforcement plan and supporting SOPs.

2) Emergency tasks to be performed include:

   a) Maintenance of law and order.
   b) Traffic control.
c) Terrorist incident response at the Basic Level.
d) Provision of security for vital facilities, evacuated areas, and shelters.
e) Access control for damaged or contaminated areas.
f) Warning support.
g) Post-incident reconnaissance and damage assessment.
h) Prepare and maintain law enforcement resource inventory.

h. Health and Medical Services.

1) Primary responsibility for this function is assigned to the City/County Office of Emergency Management who will prepare and maintain Annex H (Health & Medical Services) to this plan and supporting SOPs.

2) Emergency tasks to be performed include:

   a) Coordinate health and medical care and EMS support during emergency situations.
   b) Public health information and education.
   c) Inspection of food and water supplies.
   d) Develop emergency public health regulations and orders.
   e) Coordinate collection, identification, and interment of deceased victims.

i. Direction and Control.

1) Primary responsibility for this function is assigned to UTEP’s Office of Emergency Management who will prepare and maintain the Direction & Control plan and supporting SOPs.

2) Emergency tasks to be performed include:

   a) Direct and control our local operating forces.
   b) Maintain coordination with neighboring jurisdictions and the Disaster District in El Paso.
   c) Maintain the EOC in an operating mode or be able to convert the designated facility space into an operable EOC rapidly.
   d) Assigns representatives, by title, to report to the EOC and develops procedures for crisis training.
   e) Develops and identifies the duties of the staff, use of displays and message forms, and procedures for EOC activation.
   f) Coordinates the evacuation of areas at risk.

1) UTEP’s Office of Environmental Health and Safety’s Hazardous Materials and Waste Program focuses on compliance with environmental regulations associated with the Federal Clean Water Act, Clean Air Act, Toxic Substances Control Act, Resource Conservation and Recovery Act, as well as other city and state related rules. In addition to the compliance requirements, the Hazardous Materials and Waste Program provides a number of activities and services, which include chemical and infectious waste disposal, radioactive waste
disposal, universal waste recycling, pollution prevention and waste minimization activities, and education. The University does not respond to major Hazardous Materials incidents or oil spills.

2) Therefore, the primary responsibility for this function is assigned to the City/County Office of Emergency Management who will prepare and maintain the Hazardous Material & Oil Spill Response plan and supporting SOPs.

3) Emergency tasks to be performed include:
   a) In accordance with OSHA regulations, establish ICS to manage the response to hazardous materials incidents.
   b) Establish the hazmat incident functional areas (e.g., Hot Zone, cool zone, Cold Zone, etc.)
   c) Determine and implement requirements for personal protective equipment for University Staff, Faculty, and Environmental Health & Safety responders.
   d) Initiate appropriate actions to control and eliminate the hazard in accordance with established hazmat response guidance and SOPs.
   e) Determine areas at risk and which public protective actions, if any, should be implemented.
   f) Determines when affected areas may be safely reentered.

k. Terrorist Incident Response.
   1) Primary responsibility for this function is assigned to the City/County of El Paso Office of Emergency Management who will prepare and maintain the Terrorist Incident Response plan and supporting SOPs.

2) Emergency tasks to be performed include:
   a) Coordinate and carry out defensive anti-terrorist activities, including criminal intelligence, investigation, protection of facilities, and public awareness activities.
   b) Coordinate and carry out offensive counter-terrorist operations to neutralize terrorist activities in conjunction with local, state, and federal law enforcement agencies.
   c) Ensure required notification of terrorist incidents is made to state and federal authorities.

6. Support Services Responsibilities
   a. Shelter and Mass Care.
      1) Primary responsibility for this function is assigned to the City/County of El Paso Office of Emergency Management who will prepare and maintain the Shelter and Mass Care plan and supporting SOPs

      2) Emergency tasks to be performed include:
a) Perform emergency shelter and mass care planning.
b) Coordinate and conduct shelter and mass care operations with relief agencies, and volunteer groups.

b. Public Information.

1) Primary responsibility for this function is assigned to UTEP’s Public Information Officer. The Office of Emergency Management will assist in the preparation and maintenance of the Public Information plan and supporting SOPs.

2) Emergency tasks to be performed include:

a) Establish a Joint Information Center (JIC)
b) Conduct on-going hazard awareness and public education programs.
c) Pursuant to the Joint Information System (JIS), compile and release information and instructions for the public during emergency situations and respond to questions relating to emergency operations.
d) Provide information to the media and the public during emergency situations.
e) Arrange for media briefings.
f) Compiles print and photo documentation of emergency situations.

c. Recovery.

1) Primary responsibility for this function is assigned to UTEP’s Facilities Services. The Office of Emergency Management will assist in the preparation and maintenance of the Recovery plan and supporting SOPs.

2) Emergency tasks to be performed include:

a) Establish and train a damage assessment team using local personnel. Coordinate the efforts of that team with state and federal damage assessment personnel who may be dispatched to assist us.
b) Assess and compile information on damage to University property and needs of disaster victims and formulate and carry out programs to fill those needs.
c) If damages are beyond the University’s capability to deal with, compile information for use by UTEP’s President’s Office and the City/County of El Paso’s elected officials in requesting state or federal disaster assistance.
d) If UTEP is determined to be eligible for state or federal disaster assistance, coordinate with state and federal agencies to carry out authorized recovery programs.

d. Public Works & Engineering.

1) Primary responsibility for this function is assigned to UTEP’s Facilities Services. The Office of Emergency Management will assist in the preparation and maintenance of the Public Works & Engineering plan and supporting SOPs.

2) Emergency tasks to be performed include:
a) Protect University facilities and vital equipment where possible.
b) Assess damage to streets, bridges, traffic control devices, and other public facilities.
c) Direct temporary repair of vital facilities.
d) Restore damaged roads and bridges.
e) Restore waste treatment and disposal systems.
f) Arrange for debris removal.
g) General damage assessment support.
h) Building inspection support.
i) Provide specialized equipment to support emergency operations.

e. Utilities.

1) Primary responsibility for this function is assigned to UTEP’s Facilities Services. The Office of Emergency Management will assist in the preparation and maintenance of the Energy and Utilities plan and supporting SOPs.

2) Emergency tasks to be performed include:

a) Prioritize restoration of utility service to vital facilities and other facilities.
b) Arrange for the provision of emergency power sources where required.
c) Assess damage to, repair, and restore public utilities.

1) Primary responsibility for this function is assigned to the UTEP’s Facilities Services. The Office of Emergency Management will assist in the preparation and maintenance of Resource Management plan and supporting SOPs.

2) Emergency tasks to be performed include:

a) Maintain an inventory of emergency resources.
b) During emergency operations, locates supplies, equipment, and personnel to meet specific needs.
c) Maintain a list of suppliers for supplies and equipment needed immediately in the aftermath of an emergency.
d) Establish emergency purchasing procedures and coordinate emergency procurements.
e) Establish and maintain a manpower reserve and coordinate assignment of reserve personnel to departments and agencies that require augmentation.
f) Coordinate transportation, sorting, temporary storage, and distribution of resources during emergency situations.
g) Establish staging areas for resources, if required.
h) Maintain records of emergency-related expenditures for purchases and personnel.

g. Human Services.
1) Primary responsibility to prepare and maintain Annex O (Human Services) for this plan and supporting SOPs belongs to the City/County of El Paso Office of Emergency Management.

2) Emergency tasks to be performed by the Human Services Agency Representative include:

   a) Identify emergency feeding sites.
   b) Identify sources of clothing for disaster victims.
   c) Secure emergency food supplies.
   d) Coordinate the operation of shelter facilities, whether operated by local government, local volunteer groups, or organized disaster relief agencies such as the American Red Cross.
   e) Coordinate special care requirements for disaster victims such as the aged, special needs individuals, and others.
   f) Coordinate the provision of disaster mental health services to disaster victims, emergency workers, and/or others suffering trauma due to the emergency incident/disaster.

h. Hazard Mitigation.

1) The primary responsibility for this function is assigned to UTEP’s Office of Emergency Management will prepare and maintain the Hazard Mitigation plan and supporting SOPs.

2) Emergency tasks to be performed include:

   a) Maintain the local Hazard Analysis.
   b) In the aftermath of an emergency, determine appropriate actions to mitigate the situation and coordinate implementation of those actions.

i. Transportation.

1) The primary responsibility for this function is assigned to UTEP’s Business Affairs Division, Parking and Transportation Services. The Office of Emergency Management will assist in the preparation and maintenance of the Transportation plan and supporting SOPs.

2) Emergency tasks to be performed include:

   a) Identifies local public and private transportation resources and coordinates their use in emergencies.
   b) Coordinates deployment of transportation equipment to support emergency operations.
   c) Establishes and maintains a reserve pool of drivers, maintenance personnel, parts, and tools.
   d) Maintains records on use of transportation equipment and personnel for purpose of possible reimbursement.
j. Department and agency heads not assigned a specific function in this plan will be prepared to make their resources available for emergency duty at the direction of UTEP’s President’s Office.

7. Volunteer & Other Services

   a. Volunteer Groups. The following are local volunteer agencies that can provide disaster relief services and traditionally have coordinated their efforts within our local area of operations:

      1) El Paso Area Chapter, American Red Cross.

         Provides shelter management, feeding at fixed facilities and through mobile units, first aid, replacement of eyeglasses and medications, provision of basic clothing, and limited financial assistance to those affected by emergency situations. The Red Cross also provides feeding for emergency workers.

      2) The Salvation Army.

         Provides emergency assistance to include mass and mobile feeding, temporary shelter, counseling, missing person services, medical assistance, and the warehousing and distribution of donated good including food clothing, and household items. It also provides referrals to government and private agencies for special services.

      3) Southern Baptist Convention Disaster Relief.

         Provides mobile feeding units staffed by volunteers. Active in providing disaster childcare, the agency has several mobile childcare units. Can also assist with clean-up activities, temporary repairs, reconstruction, counseling, and bilingual services.

VII. DIRECTION AND CONTROL

A. General

1. The University President is responsible for establishing objectives and policies for emergency management and providing general guidance for disaster response and recovery operations, all in compliance with the NIMS. During disasters, [he/she] may carry out those responsibilities from the EOC.

2. The Executive Vice President or Emergency Management Coordinator will provide overall direction of the response activities of all our departments. During major emergencies and disaster, [he/she] will normally carry out those responsibilities from the EOC.

3. The Emergency Management Coordinator may assist in the management of the EOC.
4. The Incident Commander, assisted by a staff sufficient for the tasks to be performed, will manage the emergency response at an incident site.

5. During emergency operations, department heads retain administrative and policy control over their employees and equipment. However, personnel and equipment will carry out mission assignments directed by the incident commander. Each department and agency is responsible for having its own operating procedures to be followed during response operations, but interagency procedures, such as a common communications protocol, may be adopted to facilitate a coordinated effort.

6. If UTEP’s resources are insufficient or inappropriate to deal with an emergency situation, UTEP may request assistance from other jurisdictions, organized volunteer groups, the UT System or the State.

B. Emergency Facilities

1. Incident Command Post. Except when an emergency situation threatens, but has not yet occurred, and those situations for which there is no specific hazard impact site (such as a severe winter storm or area-wide utility outage), an incident command post or command posts will be established in the vicinity of the incident site(s). As noted previously, the incident commander will be responsible for directing the emergency response and managing the resources at the incident scene.

2. Emergency Operating Center. When major emergencies and disasters have occurred or appear imminent, UTEP will activate its EOC, which is located at the UTEP Police Department.

3. The following individuals are authorized to activate the EOC:
   a. UTEP PD Chief of Police
   b. UTEP PD Assistant Chief of Police
   c. UTEP PD Office of Uniform Operations
   d. UTEP EH&S/OEM Emergency Management Coordinator

4. The general responsibilities of the EOC are to:
   a. Assemble accurate information on the emergency situation and current resource data to allow local officials to make informed decisions on courses of action.
   b. Working with representatives of emergency services, determine and prioritize required response actions and coordinate their implementation.
   c. Provide resource support for emergency operations.
   d. Suspend or curtail government services, recommend the closure of schools and businesses, and cancellation of public events.
e. Organize and activate large-scale evacuation and mass care operations.

f. Provide emergency information to the public.

5. Representatives of those departments and agencies assigned emergency functions in this plan will staff the EOC.

C. Line of Succession

1. The line of succession for the University President is:
   a. University President
   b. Executive Vice President
   c. Assistant to the President

2. The line of succession for the Chief of Police is:
   a. Chief of Police
   b. Assistant Chief of Police
   c. Office of Uniformed Operations

3. The line of succession for the Emergency Management Coordinator is:
   a. EH&S/OEM Emergency Management Coordinator

4. The lines of succession for each of our department and agency heads shall be in accordance with the SOPs established by those departments and agencies.

VIII. READINESS LEVELS

A. Many emergencies follow some recognizable build-up period during which actions can be taken to achieve a gradually increasing state of readiness. We use a four-tier system. Readiness Levels will be determined by the Emergency Management Coordinator. General actions to be taken at each readiness level are outlined in the appendices to this plan; more specific actions will be detailed in departmental or agency SOPs.

B. The following Readiness Levels will be used as a means of increasing our alert posture.

1. Level 4: Normal Conditions
a. Emergency incidents occur and local officials are notified. One or more departments or agencies respond to handle the incident; an incident command post may be established. Limited assistance may be requested from other jurisdictions pursuant to established inter-local agreements.

b. The normal operations of the University are not affected.

2. Level 3: Increased Readiness

a. Increased Readiness refers to a situation that presents a greater potential threat than “Level 4”, but poses no immediate threat to life and/or property. Increased readiness actions may be appropriate when the situations similar to the following occur:

1) **Tropical Weather Threat.** A tropical weather system has developed that has the potential to impact the local area. Readiness actions may include regular situation monitoring, a review of plans and resource status, determining staff availability and placing personnel on-call.

2) **Tornado Watch** indicates possibility of tornado development. Readiness actions may include increased situation monitoring and placing selected staff on alert.

3) **Flash Flood Watch** indicates flash flooding is possible due to heavy rains occurring or expected to occur. Readiness actions may include increased situation-monitoring, reconnaissance of known trouble spots, deploying warning signs.

4) **Wildfire Threat.** During periods of extreme wildfire threat, readiness actions may include deploying additional resources to areas most at risk, arranging for standby commercial water tanker support, conducting daily aerial reconnaissance, or initiating burn bans.

5) **Mass Gathering.** For mass gatherings with previous history of problems, readiness actions may include reviewing security, traffic control, fire protection, and first aid planning with organizers and determining additional requirements.

b. Declaration of “Level 3” will generally require the initiation of the “Increased Readiness” activities.

3. Level 2: High Readiness

a. High Readiness refers to a situation with a significant potential and probability of causing loss of life and/or property. This condition will normally require some degree of warning to the public. Actions could be triggered by severe weather warning information issued by the National Weather Service such as:

1) **Tropical Weather Threat.** A tropical weather system may impact the local area within 72 hours. Readiness actions may include continuous storm monitoring, identifying worst-case decision points, increasing preparedness of personnel and equipment, updating evacuation checklists, verifying evacuation route status, and providing the public information for techniques to protect homes and businesses on the evacuation routes.
2) **Tornado Warning.** Issued when a tornado has actually been sighted in the vicinity or indicted by radio, and may strike in the local area. Readiness actions may include activating the EOC, continuous situation monitoring, and notifying the public about the warning.

3) **Flash Flood Warning.** Issued to alert persons that flash flooding is imminent or occurring on certain steams or designated areas, and immediate action should be taken. Readiness actions may include notifying the public about the warning, evacuating low-lying areas, open shelters to house evacuees, and continuous situation monitoring.

4) **Winter Storm Warning.** Issued when heavy snow, sleet, or freezing rain are forecast to occur separately or in a combination. Readiness actions may include preparing for possible power outages, putting road crews on stand-by to clear and/or sand the roads, and continuous situation monitoring.

5) **Mass Gathering.** Civil disorder with relatively large-scale localized violence is imminent. Readiness actions may include increased law enforcement presence, putting hospitals and fire departments on alert, and continuous situation monitoring.

b. Declaration of a “Level 2” will generally require the initiation of the “High Readiness” activities identified in each appendix to this plan.

4. **Level 1: Maximum Readiness**

a. Maximum Readiness refers to situation that hazardous conditions are imminent. This condition denotes a greater sense of danger and urgency than associated with a “Level 2” event. Actions could also be generated by severe weather warning information issued by the National Weather Service combined with factors making the event more imminent.

1) **Tropical Weather Threat.** The evacuation decision period is nearing for an approaching tropical weather system that may impact the local area. Readiness actions may include continuous situation monitoring, culminating activation of the EOC, recommending precautionary actions for special facilities, placing emergency personnel and equipment into position for emergency operations, and preparing public transportation resources for evacuation support.

2) **Tornado Warning.** Tornado has been sighted especially close to a populated area or moving towards a populated area. Readiness actions may include taking immediate shelter and put damage assessment teams on stand-by.

3) **Flash Flood Warning.** Flooding is imminent or occurring at specific locations. Readiness actions may include evacuations, rescue teams on alert, sheltering evacuees and/or others displaced by the flooding, and continuous monitoring of the situation.
4) Mass Gathering. Civil disorder is about to erupt into large-scale and widespread violence. Readiness actions may include having all EMS units on stand-by, all law enforcement present for duty, notify the DDC that assistance may be needed and keep them apprised of the situation, and continuous situation monitoring is required.

b. Declaration of “Level 1” will generally require the initiation of the “Maximum Readiness” activities.

IX. ADMINISTRATION AND SUPPORT

A. Agreements and Contracts

1. Should UTEP’s resources prove to be inadequate during an emergency, requests will be made for assistance from local jurisdictions, other agencies, and industry in accordance with existing mutual-aid agreements and contracts and those agreements and contracts concluded during the emergency. Such assistance may include equipment, supplies, or personnel. All agreements will be entered into by authorized officials and should be in writing whenever possible. Agreements and contracts should identify the local officials authorized to request assistance pursuant to those documents.

2. In an effort to facilitate assistance pursuant to mutual aid agreements, UTEP’s available resources are identified and are a part of the Texas Regional Response Network (TRRN).

3. The agreements and contracts pertinent to emergency management that UTEP is a party to are summarized in Attachment 5.

B. Reports

1. Hazardous Materials Spill Reporting. If UTEP is responsible for a release of hazardous materials of a type or quantity that must be reported to state and federal agencies, the department or agency responsible for the spill shall make the required report. If the party responsible for a reportable spill cannot be located, the Incident Commander shall ensure that the required report(s) are made.

2. Initial Emergency Report. This short report should be prepared and transmitted by the EOC when an on-going emergency incident appears likely to worsen and UTEP may need assistance from local government or the State.

3. Situation Report. A daily situation report should be prepared and distributed by the EOC during major emergencies or disasters.

C. Records
1. Record Keeping for Emergency Operations

UTEP is responsible for establishing the administrative controls necessary to manage the expenditure of funds and to provide reasonable accountability and justification for expenditures made to support emergency operations. This shall be done in accordance with the established local fiscal policies and standard cost accounting procedures.

a. Activity Logs. The Incident Command Post and the EOC shall maintain accurate logs recording key response activities, including:

1) Activation or deactivation of emergency facilities.
2) Emergency notifications to local government and to state and federal agencies.
3) Significant changes in the emergency situation.
4) Major commitments of resources or requests for additional resources from external sources.
5) Issuance of protective action recommendations to the public.
6) Evacuations.
7) Casualties.
8) Containment or termination of the incident.

b. Incident Costs. All departments and agencies shall maintain records summarizing the use of personnel, equipment, and supplies during the response to day-to-day incidents to obtain an estimate of annual emergency response costs that can be used as in preparing future department or agency budgets.

c. Emergency or Disaster Costs. For major emergencies or disasters, all departments and agencies participating in the emergency response shall maintain detailed costs for emergency operations to include:

1) Personnel costs, especially overtime costs.
2) Equipment operations costs.
3) Costs for leased or rented equipment.
4) Costs for contract services to support emergency operations.
5) Costs of specialized supplies expended for emergency operations.

These records may be used to recover costs from the responsible party or insurers or as a basis for requesting financial assistance for certain allowable response and recovery costs from the state and/or federal government.

2. Preservation of Records

a. In order to continue normal University operations following an emergency situation disaster, vital records must be protected. These include legal documents as well as property and tax records. The principal causes of damage to records are fire and water; therefore, essential records should be protected accordingly. Each department or agency responsible for preparation of appendices to this plan will include protection of vital records in its SOPs.
b. If records are damaged during an emergency situation, UTEP will seek professional assistance to preserve and restore them.

D. Training

It will be the responsibility of each department Vice President, Dean, or Director to ensure that personnel are in accordance with the NIMS, possess the level of training, experience, credentialing, currency, physical and medical fitness, or capability for any positions they are tasked to fill.

E. Consumer Protection

Consumer complaints regarding alleged unfair or illegal business practices often occur in the aftermath of a disaster. Such complaints will be referred to UTEP’s Office of Legal Affairs who will pass such complaints to the Consumer Protection Division of the Office of the Attorney General.

F. Post-Incident and Exercise Review

UTEP’s Office of Emergency Management is responsible for organizing and conducting a critique following the conclusion of a significant emergency event/incident or exercise. The After Action Report (AAR) will entail both written and verbal input from all appropriate participants. An Improvement Plan will be developed based on the deficiencies identified, and an individual, department, or agency will be assigned responsibility for correcting the deficiency and a due date shall be established for that action.

<tr>
<td>B. Distribution of Planning Documents</td>
</tr>
<tr>
<td>1. UTEP’s President’s Office shall determine the distribution of this plan and its appendices. In general, copies of plans and appendices should be distributed to those individuals, departments, agencies, and organizations tasked in this document. Copies should also be set-aside for the EOC and other emergency facilities.</td>
</tr>
<tr>
<td>2. The Basic Plan should include a distribution list (See Attachment 1 to this plan) that indicates who receives copies of the basic plan.</td>
</tr>
<tr>
<td>C. Review</td>
</tr>
</tbody>
</table>
The Basic Plan shall be reviewed annually by those individuals, departments, agencies, and organizations tasked in this document. The EMC will establish a schedule for annual review of planning documents by those tasked in them.

D. **Update**

1. This plan will be updated based upon deficiencies identified during actual emergency situations and exercises and when changes in threat hazards, resources and capabilities, or structure occur.

2. The Basic Plan must be revised or updated by a formal change at least **every 2 years**. Responsibility for revising or updating the Basic Plan is assigned to UTEP’s EMC.

3. Revised or updated planning documents will be provided to all departments, agencies, and individuals tasked in those documents.

P – INDICATES PRIMARY RESPONSIBILITY
S – INDICATES SUPPORT RESPONSIBILITY
C – INDICATES COORDINATION RESPONSIBILITY
Agreements

Description: UT System Interagency Resource Guidebook
Summary of Provisions: Mutual aid for services at UTEP campuses
Officials authorized to implement: Executive Vice President
Costs: TBD by UT Interagency Resource Guidebook
Copies held by: Executive Vice President, UTEP Chief of Police, and Assistant Vice President EH&S

UTEP has several verbal Mutual Aid Agreements authorized by UT System Policy 172

Contracts

Description: Sodexo Food Service Contract
Summary of Provisions: Sodexo may provide emergency food service for responders and all individuals impacted by the event as identified by the University.
Cost: As used per person basis
Copies held by: Executive Vice President and campus operations and the coordinator emergency operations

Description: First Group/Miner Metro emergency transportation contract
Summary of Provisions: Transportation may be provided to students without means to evacuate the campus based upon availability of a vehicle at the time of need by Eagle Tours INC.
Cost: As designated in purchase order
Copies held by: Assistant Vice President Business Affairs
A. BACKGROUND

1. NIMS is a comprehensive, national approach to incident management that is applicable to all jurisdictional levels and across functional disciplines. This system is suitable across a wide range of incidents and hazard scenarios, regardless of size or complexity. It provides a flexible framework for all phases of incident management, as well as requirements for processes, procedures, and systems designed to improve interoperability.

2. NIMS is a multifaceted system that provides a national framework for preparing for, preventing, responding to, and recovering from domestic incidents.

B. COMPONENTS

1. Command and Management. The incident management structures employed by NIMS can be used to manage emergency incidents or non-emergency events such as celebrations. The system works equally well for small incidents and large-scale emergency situations. The system has built-in flexibility to grow or shrink depending on current needs. It is a standardized system, so personnel from a variety of agencies and geographic locations can be rapidly incorporated into a common management structure.

   a. Incident Management System. A system that can be used to manage emergency incidents or non-emergency events such as celebrations.

      1) FEATURES OF ICS

      ICS has a number of features that work together to make it a real management system. Among the primary attributes of ICS are:

      a) Common Terminology. ICS requires the use of common terminology, such as the use of standard titles for facilities and positions within an organization, to ensure efficient and clear communications.

      b) Organizational Resources. All resources including personnel, facilities, major equipment, and supply items used to support incident management activities must be “typed” with respect to capability. This typing will minimize confusion and enhance interoperability.

      c) Manageable Span of Control. Span of control should ideally vary from three to seven. Anything less or more requires expansion or consolidation of the organization.

      d) Organizational Facilities. Common terminology is used to define incident facilities, the activities conducted at these facilities, and the organizational positions that can be found working there.
e) Use of Position Titles. All ICS positions have distinct titles.

f) Reliance on an Incident Action Plan. The incident action plan, which may be verbal or written, is intended to provide supervisory personnel a common understanding of the situation and direction for future action. The plan includes a statement of objectives, organizational description, assignments, and support material such as maps. Written plans are desirable when two or more jurisdictions are involved, when state and/or federal agencies are assisting local response personnel, or there has been significant turnover in the incident staff.

g) Integrated Communications. Integrated communications includes interfacing disparate communications as effectively as possible, planning for the use of all available systems and frequencies, and requiring the use of clear text in communications.

h) Accountability. ICS is based on an orderly chain of command, check-in for all responders, and only one supervisor for each responder.

2) UNIFIED COMMAND

a) Unified Command is a variant of ICS used when there is more than one agency or jurisdiction with responsibility for the incident or when personnel and equipment from a number of different agencies or jurisdictions are responding to it. This might occur when the incident site crosses jurisdictional boundaries or when an emergency situation involves matters for which state and/or federal agencies have regulatory responsibility or legal requirements.

b) ICS Unified Command is intended to integrate the efforts of multiple agencies and jurisdictions. The major change from a normal ICS structure is at the top. In a Unified command, senior representatives of each agency or jurisdiction responding to the incident collectively agree on objectives, priorities, and an overall strategy or strategies to accomplish objectives; approve a coordinated Incident Action Plan; and designate an Operations Section Chief. The Operations Section Chief is responsible for managing available resources to achieve objectives. Agency and jurisdictional resources remain under the administrative control of their agencies or jurisdictions, but respond to mission assignments and direction provided by the Operations Section Chief based on the requirements of the Incident Action Plan.

3) AREA COMMAND

a) An Area Command is intended for situations where there are multiple incidents that are each being managed by an ICS organization or to oversee the management of large or multiple incidents to which several Incident Management Teams have been assigned. Area Command becomes Unified Area Command when incidents are multijurisdictional.

b) The organization of an Area Command is different from a Unified Command in that there is no operations section, since all operations are conducted on-scene, at the separate ICPs.
b. Multiagency Coordination Systems. Multiagency coordination systems may be required for incidents that require higher level resource management or information management. The components of multiagency coordination systems include facilities, equipment, EOCs, specific multiagency coordination entities, personnel, procedures, and communications; all of which are integrated into a common framework for coordinating and supporting incident management.

c. Public Information. The NIMS system fully integrates the ICS Joint Information System (JIS) and the Joint Information Center (JIC). The JIC is a physical location where public information staff involved in incident management activities can collocate to perform critical emergency information, crisis communications, and public affairs functions. More information on JICs can be obtained in the DHS National Incident Management System Plan, dated March 2004.

2. Preparedness. Preparedness activities include planning, training, and exercises as well as certification of response personnel, and equipment acquisition and certification. Activities would also include the creation of mutual aid agreements and Emergency Management Assistance Compacts. Any public information activities such as publication management would also be preparedness activities.

3. Resource Management. All resources, such as equipment and personnel, must be identified and typed. Systems for describing, inventorying, requesting, and tracking resources must also be established.

4. Communications and Information Management. Adherence to NIMS specified standards by all agencies ensures interoperability and compatibility in communications and information management.

5. Supporting Technologies. This would include any technologies that enhance the capabilities essential to implementing the NIMS. For instance, voice and data communication systems, resource tracking systems, or data display systems.

6. Ongoing Management and Maintenance. The NIMS Integration Center provides strategic direction and oversight in support of routine review and continual refinement of both the system and its components over the long term.
Sec. 51.217. Multihazard Emergency Operations Plan; Safety and Security Audit. (a) In this section, "institution" means a general academic teaching institution, a medical and dental unit, or other agency of higher education, as those terms are defined by Section 61.003.

(b) An institution shall adopt and implement a multi-hazard emergency operations plan for use at the institution. The plan must address mitigation, preparedness, response, and recovery. The plan must provide for:

1. Employee training in responding to an emergency;
2. Mandatory drills to prepare students, faculty, and employees for responding to an emergency;
3. Measures to ensure coordination with the Department of State Health Services, local emergency management agencies, law enforcement, health departments, and fire departments in the event of an emergency; and
4. The implementation of a safety and security audit as required by Subsection (c).

(c) At least once every three years, an institution shall conduct a safety and security audit of the institution’s facilities. To the extent possible, an institution shall follow safety and security audit procedures developed in consultation with the Division of Emergency Management of the Office of the Governor.

(d) An institution shall report the results of the safety and security audit conducted under Subsection (c) to the institution’s board of regents and the division of emergency management of the office of the governor.

(e) Except as provided by Subsection (f), any document or information collected, developed, or produced during a safety and security audit conducted under Subsection (c) is not subject to disclosure under Chapter 552, Government Code.

(f) A document relating to an institution’s multi-hazard emergency operations plan is subject to disclosure if the document enables a person to:
(1) VERIFY THAT THE INSTITUTION HAS ESTABLISHED A PLAN AND DETERMINE THE
AGENCIES INVOLVED IN THE DEVELOPMENT OF THE PLAN AND THE AGENCIES COORDINATING WITH THE
INSTITUTION TO RESPOND TO AN EMERGENCY, INCLUDING THE DEPARTMENT OF STATE HEALTH
SERVICES, LOCAL EMERGENCY SERVICES AGENCIES, LAW ENFORCEMENT AGENCIES, HEALTH
DEPARTMENTS, AND FIRE DEPARTMENTS;

(2) VERIFY THAT THE INSTITUTION’S PLAN WAS REVIEWED WITHIN THE LAST 12 MONTHS
AND DETERMINE THE SPECIFIC REVIEW DATES;

(3) VERIFY THAT THE PLAN ADDRESSES THE FOUR PHASES OF EMERGENCY
MANAGEMENT UNDER SUBSECTION (B);

(4) VERIFY THAT INSTITUTION EMPLOYEES HAVE BEEN TRAINED TO RESPOND TO AN
EMERGENCY AND DETERMINE THE TYPES OF TRAINING, THE NUMBER OF EMPLOYEES TRAINED, AND THE
PERSON CONDUCTING THE TRAINING;

(5) VERIFY THAT EACH CAMPUS HAS CONDUCTED MANDATORY EMERGENCY DRILLS
AND EXERCISES IN ACCORDANCE WITH THE PLAN AND DETERMINE THE FREQUENCY OF THE DRILLS;

(6) VERIFY THAT THE INSTITUTION HAS COMPLETED A SAFETY AND SECURITY AUDIT
UNDER SUBSECTION © AND DETERMINE THE DATE THE AUDIT WAS CONDUCTED, THE PERSON
CONDUCTING THE AUDIT, AND THE DATE THE INSTITUTION PRESENTED THE RESULTS OF THE AUDIT TO
THE BOARD OF REGENTS; AND

(7) VERIFY THAT THE INSTITUTION HAS ADDRESSED ANY RECOMMENDATIONS BY THE BOARD OF
REGENTS FOR IMPROVEMENT OF THE PLAN AND DETERMINE THE INSTITUTION’S PROGRESS WITHIN
THE LAST 12 MONTHS
