# ARITH 2025

**MAY 4-7 2025** | El Paso, TX

Computer arithmetic has always been at the core of the digital age, and is currently driving innovation in domains such as artificial intelligence, high-performance computing, signal processing, and security. Since 1969, the ARITH symposia have served as the flagship conference for presenting scientific work on the latest research in computer arithmetic. ARITH 2025 is the latest in this series, and we invite you to participate.
