Applicant Information Please type or print clearly

Name: ________________________________________________________________

UTEP ID: __________________________________________________________________

E-mail: __________________________________________________________________

Major GPA: __________________ Overall GPA: __________ Hrs Enrolled: _________

Classification: ____________________________________________________________________________ Expected Graduation Date: __________

Have you taken any technical elective or math/science elective courses? [ ] Yes [ ] No

If yes, please list them:

_______________________________________________________________________________

_______________________________________________________________________________

_______________________________________________________________________________

References:

1) ____________________________________________________________________________

(must be UTEP Faculty)

2) ____________________________________________________________________________

Student Signature: ___________________________ Date: __________

* In addition to the application, please submit the following to the Mechanical Engineering Department (Engineering A126):
1. An unofficial transcript
2. A statement of purpose

FOR OFFICE USE ONLY

Admitted [ ] Yes [ ] No ___________________________ Date ___________________________ Signature
GENERAL INFORMATION:

The Accelerated BS/MS program would allow for a student to count 9 credit hours from their BSME degree plan from UTEP to their MSME degree plan. This would allow for a student to effectively obtain their MS degree (thesis-track) with only an additional 21 credit hours (seven classes) beyond the classes required for the BS degree.

Undergraduate students will be required to take 5000 MECH classes for both their undergraduate technical electives (6 credit hours) and their math/science elective (3 credit hours).

ADMISSION REQUIREMENTS:

» Apply during Junior year (at least 60 credit hrs completed)
» Undergraduate GPA ≥ 3.3
» GRE ≥ 155 (to be taken during Senior year)
» Two references from UTEP Mechanical Engineering Faculty (provide names, not official letters).
