

Continuous Improvement

Course description: This hands-on and dynamic training introduces participants to the different types of waste, analysis techniques for measuring systems and processes and to vanguard methodologies to define improvement initiatives that will be value added to the organization and support their company's bottom line.

Participants of this workshop will review tools to analyze and improve their company's processes and systems by focusing on eliminating waste and variation from their day to day operations.

Topics Include:

- Value Added vs. Non-value added
- Identifying Waste
- Reducing variation
- Efficacy and Efficiency
- SOPs

Objectives:

- Learn how to make data driven decisions
- Make processes better, faster, low cost and safer
- Focus on the voice of the customer
- Implement a culture of continuous improvement
