RE: Changes to various undergraduate courses in EE

The faculty of the ECE Department approved the following course changes:

- EE 3329: Change of pre-requisites
- EE 3384: Changes in title and description
- EE 4350: Changes in title, pre-requisites, description, and allow 2 repeats for credit
- EE 4356: Changes in title, pre-requisites, and description

Specific details are provided in the attached forms.
Proposal Title: Changes to various undergraduate courses in EE

Department Chair
I have read the enclosed proposal and approve this proposal on behalf of the department.

Signature

Date

College Curriculum Committee Chairperson
I have read the enclosed documents and approve the proposal on behalf of the college curriculum committee.

Signature

Date

College Dean
I have read the enclosed documents and approve the proposal on behalf of the college. I certify that the necessary funds will be allocated by the college in support of this proposal.

Signature

Date

Graduate Council/Undergraduate Curriculum Committee
Council Action: ☐ Approved ☐ Returned to the College

Date of Action Report: _____________________________

Signature, Chairman

Date
Julie,

Here is the approval for the first proposal.

Best Regards,

Virginia

Subject: FW: Approved UG Proposal by COECC on May 5, 2020

This looks good. I approve.

Subject: Approved UG Proposal by COECC on May 5, 2020

Dr. Everett,

I am attaching the UG proposal that was approved by the COECC today for your signature/approval.

Please send me an email approving the proposal or email me the version with your signature.

Have a good weekend,

Virginia
Rationale for changing the course:
EE 3329 is a junior level course, however many students take the course in their last year due to the long pre-requisite critical path. This is preventing students from being able to take follow-on technical electives. The changes will allow students to enroll in EE 3329 sooner in their degree plan. Any necessary quantum mechanics topics are covered within EE 3329. The required concepts of electromagnetism are covered in PHYS 2421. Required electronic circuit concepts are covered in EE 3338.

Subject Prefix and number EE 3329

Course Title  Fundamentals of Semiconductor Devices

<table>
<thead>
<tr>
<th>Change</th>

<th>To</th>
</tr>
</thead>
<tbody>
<tr>
<td>Ex. Prerequisite</td>
<td>Ex. POLS 2310</td>
<td>Ex. POLS 2312</td>
</tr>
<tr>
<td>Prerequisites</td>
<td>EE 3325 and EE 3321 each with grade of &quot;C&quot; or better.</td>
<td>PHYS 2421 and EE 3338 each with grade of &quot;C&quot; or better.</td>
</tr>
</tbody>
</table>
COURSE CHANGE FORM

All fields below are required

College:  Engineering          Department: Electrical and Computer Engineering

Rationale for changing the course:

Update course title and description to emphasize focus on applications to Electrical and Computer Engineering.

All fields below are required

Subject Prefix and number: EE 3384

Course Title:  Probabilistic Methods in Engineering and Science

<table>
<thead>
<tr>
<th>Change</th>
<th>From</th>
<th>To</th>
</tr>
</thead>
<tbody>
<tr>
<td>Description</td>
<td>Probabilistic Methods in Engineering and Science (3-0) Problems involving discrete and continuous random variables, distribution functions, moments, statistical dependence and an introduction to statistical methods. Emphasis to be on formulation of physical problems.</td>
<td>Introduction to probability, sets, combinatorics, random variables, distribution functions, conditional probability, statistical independence, moments, functions of random variables, and Central limit theorem. Computer simulations illustrate various concepts. Provides applications in Electrical and Computer Engineering.</td>
</tr>
<tr>
<td>Title</td>
<td>Probabilistic Methods in Engineering and Science</td>
<td>Introduction to Probability with Applications in Electrical and Computer Engineering (Short version - Intro to Prob. with App. in ECE)</td>
</tr>
</tbody>
</table>
Rationale for changing the course:
EE 4350 is an undergraduate technical elective in EE. This is an update of the title and course description to reflect what is taught in the course in a rapidly changing and growing field. The new description will allow distinct instructors to teach contemporary devices in their particular area of expertise. The new restriction will allow students to take the course at most twice when different topics are covered. The addition of Quantum Mechanics (EE 3325) pre-requisite will ensure all students have the proper technical background for the course.

All fields below are required
COURSE CHANGE FORM

All fields below are required

College: Engineering  Department: Electrical and Computer Engineering

Rationale for changing the course:
Update course title and description. The title needs to include the word digital to make clear both (a) the emphasis on digital (discrete-time) signal processing and (b) its association with the pre-requisites EE 3353 and EE 3376 (or CS 3432). The new description reorganizes the previous course description and removes the sentence "emphasizing the practical aspects of design over theory," that could convey the misconception of no need for DSP theory.

All fields below are required

Subject Prefix and number EE 4356

Course Title  Real-Time Signal Processing

<table>
<thead>
<tr>
<th>Change</th>
<th>From</th>
<th>To</th>
</tr>
</thead>
<tbody>
<tr>
<td>Description</td>
<td>Real Time Signal Processing and Communication (3-0) A project based course where filtering, spectral analysis, and modulation algorithms are implemented on modern signal processing circuits. This class is programming intensive, emphasizing the practical aspects of design over theory.</td>
<td>Programming-intensive project-based course emphasizing practical application of Digital Signal Processing (DSP) algorithms implemented on a DSP development system. Topics covered include sampling and reconstruction, digital filtering, fast Fourier transform, spectrum analysis, and modulation.</td>
</tr>
<tr>
<td>Title</td>
<td>Real Time Signal Processing</td>
<td>Real-Time Digital Signal Processing</td>
