

Key Takeaways

Employment

• Non-farm employment in November grew in El Paso and Ciudad Juárez by 1.3% (4,200 jobs gained) and 0.9% (4,200 jobs gained), respectively, with respect to October. Las Cruces non-farm employment remained stagnant. In Ciudad Juárez, non-farm employment also increased on a year-over-year basis by 2.2% (10,300 jobs gained), its largest year-over-year increase since April 2019.

Remittances

• Given the integration of border sister communities, operations that were usually conducted in person have transitioned to remote transactions due to current inland travel restrictions across the U.S. border, leading to increased electronic money transfers. Remittances to Mexican border states have increased more rapidly than those to non-border states. For border cities, the largest recorded increases for the January to September 2020 period on a year-over-year basis were observed in Tijuana (\$106 million), Mexicali (\$74 million), and Ciudad Juárez (\$50 million), respectively.

Trade

• Of the top ten U.S.-Mexico ports of entry in terms of total merchandise trade value in 2019, Santa Teresa Port of Entry (PoE) continued to suffer the most in terms of year-over-year decreases in November (-\$233 million or -10.2%), while El Paso also decreased (-\$134 million or -2.1%). Laredo, Hidalgo, Eagle Pass, and Otay Mesa were the only ports of entry to see increases in November compared to the same month last year, at \$1 billion (5.3%), \$205 million (6.9%), \$164 million (6.5%), and \$79 million (1.9%), respectively.

Employment

Jobs Show Mixed Signals Throughout Region

El Paso and Ciudad Juárez increased employment in November compared to October, while employment in Las Cruces remained stagnant.

On a monthly basis, non-farm employment in November continued to increase in El Paso and Ciudad Juárez. El Paso non-farm employment increased by 1.3% (4,200 jobs gained), its second monthly increase in a row, while in Ciudad Juárez employment increased by 0.9% (4,200 jobs gained), its sixth monthly increase in a row. Las Cruces non-farm employment registered no job growth for the period. On a year-over-year basis, however, non-farm employment in El Paso and Las Cruces decreased by 4.0% (13,300 jobs lost) and 7.5% (5,700 jobs lost), respectively. In El Paso this represented the smallest year-over-year decrease in employment since the beginning of the current recession, indicating a continued rebound; for Las Cruces, however

it represented a steeper year-over-year decline than the month prior. On the other hand, non-farm employment in Ciudad Juárez increased by 2.2% (10,300 jobs gained) in November, its largest year-over-year increase since April 2019.

Across the five sectors used to compare non-farm employment across the Paso del Norte region, in November on a monthly basis, El Paso increased in the Trade (1,900 jobs gained), Transportation and Utilities (1,500 jobs gained), and Services (1,300 jobs gained) sectors, while decreasing by 400 jobs and 100 jobs in the Manufacturing and Mining and Construction sectors, respectively. In Las Cruces, the Transportation and Utilities sector gained 100 jobs, the Services sector lost 100 jobs, and the Manufacturing, Mining and Construction, and Trade sectors exhibited no change. In Ciudad Juárez, all sectors except Services increased on a monthly basis in November, led by Manufacturing and Trade with gains of approximately 4,100 jobs and 400 jobs, respectively. On a year-over-year basis, all sectors, except Manufacturing in Ciudad Juárez and Transportation and Utilities in El Paso and Ciudad Juárez, exhibited negative growth rates. In November, the highest over-the-year job losses in absolute terms for these sectors across the region were: Services in El Paso (-12,200 approximately), Services in Las Cruces (-4,900 approximately), and Services in Ciudad Juárez (-4,400 approximately). For El Paso, the job year-over-year gain in Transportation and Utilities was the first registered across any of the five sectors since March 2020.

Remittances

Remittances Up in 2020

Ciudad Juárez received \$50 million more in remittances during the first nine months of 2020 period on a year-over-year basis.

Given the integration of border sister communities, operations and transactions that were previously conducted in-person have

been impacted and are now conducted remotely as current inland travel restrictions across the U.S. border, leading to increased electronic money transfers. Amidst the pandemic, remittances to Mexico have continuously registered increases on a year-over-year basis, except in April 2020. In fact, remittances reached their highest peak in March 2020 at around \$4 billion (35% increase), and sat at \$3.4 billion (16% increase) in November. The rate at which remittances have increased, however, differ across states, increasing more rapidly in states situated across the U.S.-Mexico border. For the January to September period on a year-over-year basis, while remittances sent to Mexican border states increased by 14.1%, those for non-border states increased by 9.3%¹. The overall increase in remittances across various regions is partially explained by fluctuations of the Mexican exchange rate, avoidance of carrying cash into Mexico in case of a layoff for those under unlawful presence, and people assisting their families in distressed situations.

Remittances to Mexican States (Million USD)

Region	2019	A Jan-Sep 2019	B Jan-Sep 2020	B-A	B-A (%)
