How to Forget a Wireless Connection in Windows 10

Here are the steps to forget the connection settings for a wireless connection in Windows 10.

1. First, open the **Settings** window in Windows 10 by clicking on the **gear icon** in the Start menu.

2. Next, choose the **Network & Internet** section of the **Settings** windows.
3. Then choose the **Wi-Fi** section of the **Network & Internet** settings window.

4. Next, choose the **Manage known networks** option under the **Wi-Fi** settings window.
5. Under the **Manage known networks** settings, choose the network that you want to forget. For UTEP’s wireless network, the network name should be **utepsecure**. Click on the network name to select it, and then click on the **Forget** button to forget it.
