

Spring 2019 Ceramics TA Monitored Lab Hours

Please note: these are the hours when a TA is present and is available to assist you.

For those of you enrolled in any Ceramics course for Spring 2019, you may work in the labs outside of these monitored hours. You may call the UTEP Police and they will let you into the studios if it is outside of the M-F 8am-5pm time window.

We'll try to get the studios open M-F by 9am, if not earlier. Please do not call the UTEP Police to let you into the labs if it is between the hours of 8am-5pm Monday-Friday.

If you would like to work when another class is in session, please check in with Professor Vincent Burke to see if space is available.
