PROFILE

My professional experiences are broadly focused on dissemination and implementation science, program evaluation, and providing and adapting evidence-based psychosocial interventions for Latinx and individuals diagnosed with serious mental illness. I have experience working in integrated care settings and interdisciplinary research teams; evaluating the effectiveness of training programs, including the implementation of psychosocial interventions in multiple clinical care settings; managing large datasets and data dashboards.

As a licensed psychologist in the States of Maryland and Texas, I currently train and have supervised providers and mental health program leaders in the delivery of Social Skills Training for Serious Mental Illness (SST) for English and Spanish-speaking individuals. In my current role as a National Trainer and Consultant for the VA Psychosocial Rehabilitation Training Program, I train providers throughout the U.S. Department of Veterans Affairs in the delivery of Social Skills Training for Serious Mental Illness (SST; Bellack, Muesser, Gingerich, & Agresta, 2004) through a day-long experiential learning session and provide 6 months of weekly clinical consultation with providers so they may reach fidelity to the SST model. I have also trained regional trainers in the SST Train-the-Trainer Program and provided seminars on advanced topics related to SST. As the Program Evaluator for the program, I manage the program's comprehensive evaluation plan and related datasets. I generate productivity reports and analyze evaluation data for the program's leaders to make data-driven decisions to improve the training program. I also develop and implement evaluation plans for the program's related projects (e.g., development of a measurement-based care survey for Veterans participating in SST Groups; evaluating a newly created suicide prevention curriculum for SST Groups; and evaluating a new protocol that allows SST Groups be delivered via telehealth).

I have also provided other evidence-based psychotherapies such as Acceptance and Commitment Therapy (ACT), Problem Solving Training (PST), Mindfulness Based Stress Reduction (MBSR), Dialectical Behavior Therapy (DBT) Program for Individuals and Couples & Families, and Prolonged Exposure for PTSD in English and Spanish to populations with behavioral health concerns. Additionally, I was trained and clinically supervised by the developers of ACT (Dr. Steve Hayes), SST (Dr. Alan Bellack), and PST (Drs. Art & Christine Nezu).

PSYCHOSOCIAL INTERVENTION PROTOCOLS AND EDUCATIONAL MATERIALS

I developed and adapted educational materials and psychosocial intervention protocols for clinicians training to implement adapted psychosocial interventions for use with cultural and linguistic minorities. Some of this work has been in collaboration with colleagues at the University of Maryland, Baltimore and the U.S. Department of Veterans Affairs, which is currently disseminating evidence-based psychotherapies to Veterans. The educational materials and psychosocial intervention protocols were

modified to consider cultural, ethnic, and linguistic concerns in the provision of the psychosocial interventions, with one protocol (SFCR) translated into Spanish.

Maternal Lifestyle Intervention for Pregnant Mexican-American Women
Psychosocial intervention protocol for clinicians.

Acceptance and Commitment Therapy with Social Skills Training for Latinos with Serious Mental Illness
