GRADUATE DEGREES IN PSYCHOLOGY AT UTEP

WHY CHOOSE UTEP PSYCHOLOGY?

✓ UTEP is an R1 research university producing top quality research, with a mission of access and excellence.
✓ As a Psychology graduate student, you will engage in the fascinating discovery of new knowledge about behavior and the underlying mental, social and biological processes. You will share that knowledge and the processes for obtaining it with our students and the scholarly community. The Psychology Department has 17 grant-active faculty and ~50 graduate students.
✓ Located on the U.S.-Mexico border, El Paso offers a thriving bicultural environment, a host of indoor and outdoor activities, and a world-famous cuisine. It is affordable, friendly, and one of the safest U.S. cities.

CAREER PATHS OF GRADUATES

CONCENTRATION TRACKS

Doctoral tracks

Behavioral Neuroscience
Investigate how the brain controls motivated behavior though rodent models and neurochemical, molecular, immunohistochemical, and genetic approaches

Health Psychology
Investigate Latino/Hispanic and other minority health disparities, health-threatening behaviors, and health-promoting behaviors

Legal Psychology
Investigate mental health and the criminal justice system, juvenile risk taking and delinquency, interrogations in criminal justice and national security and legal decision making

Bilingualism, Language and Cognition
Investigate how language happens in the mind and brain, and how the coexistence of two languages in one mind shapes human cognition throughout the lifespan

Social Psychology
Investigate the influence of social and personality factors on people’s thoughts, feelings, and behaviors, with an emphasis on social cognition

Clinical MA
Investigate health and forensic issues to prepare trainees for doctoral training in Clinical Psychology and/or work in applied settings as psychological associates or professional counselors
