Note: Attrition is calculated by (1) dividing the high school enrollment in the end year (12th grade) by the high school enrollment in the base year (9th grade); (2) multiplying the results from Calculation 1 by the ninth grade enrollment in the base year; (3) subtracting the results from Calculation 2 from the 12th grade enrollment in the year; and (4) dividing the results of Calculation 3 by the result of Calculation 2. The attrition rate results (percentages) were rounded to the nearest whole number. Data for 1990-91 and 1993-94 are not available.
