The University of Texas at El Paso
Distance Learning and Teaching Policies

This document outlines the responsibilities, processes, and resources for developing and offering hybrid and online courses and programs at UTEP and supersedes any previous subject matter guidelines.

The Office of the Provost is responsible for the implementation and oversight of these policies. Clarifying questions can be directed to the Dean of Extended University.

Definitions:

Blackboard Central: Offers faculty technical support for Blackboard

Center for Faculty Leadership and Development: Serves as a resource to support the adoption of effective, proven, and emerging pedagogical practices

Center for Instructional Design: Provides faculty preparation programs and instructional design assistance for online and hybrid courses

Distance learning: In this document, refers to fully online and hybrid courses. Fully online courses are those for which a student does not attend campus, most often, these are taught asynchronously. Hybrid courses provide a flexible schedule where students meet for some of the class time in person and complete other portions of the course online, often asynchronously.

Extended University: College-level unit that houses the Center for Instructional Design and UTEP Connect

Learning Management System (LMS): the platform that supports course delivery, regardless of the modality. At UTEP, the LMS is Blackboard.

State authorization: the legal and regulatory process that ensures distance and other educational opportunities comply with other states' regulations, rules, and statutes

UTEP Connect: Provides support through marketing, enrollment management, advising, state authorization, and logistics to all fully online degree programs

Online, Hybrid, and Classroom Courses

Blackboard shells are created for every course appearing on the UTEP schedule. UTEP offers 100% online, minimum face-to-face, hybrid, and minimum technology courses and programs at the undergraduate and graduate levels. Students taking online and hybrid courses are provided the same services available to students in face-to-face courses. These services include access to the library, financial aid, registrar, advising, technical support, and others.

Online courses, and the online portion of a hybrid course, may be asynchronous or synchronous. Asynchronous interaction occurs when students and faculty are not
required to be online at the same time. Synchronous interaction occurs when students and faculty are required to be present simultaneously using computer or video-based communication media.

Students enrolled in 100% online courses and minimum face-to-face are assessed a distance learning fee of $75/SCH at the undergraduate level and $100/SCH at the graduate level. These fees support the costs of online course development, delivery, and continuous improvement. These fees are subject to change per the course fee review process.

When registering for courses, students can identify the instructional method of courses on Goldmine according to the following tags:

**100% online:** Online courses are web-based with no face-to-face contact between students and faculty. Courses are supported by a learning management system (LMS) where instruction occurs through either asynchronous or synchronous interaction.

**Min Face-to-Face:** Minimal face-to-face courses are primarily online courses with 86 to 99% of the course work occurring online.

**HYBR:** Hybrid courses are characterized by having 50 to 85% of the course activities online with the remaining time in face-to-face classroom meetings.

**Min Tech:** Face-to-face courses with 49% or less of the course delivered online. These courses are taught using traditional classroom meetings in physical locations on or off campus between students and instructors.

**Regulatory Requirements**

**Accreditation Demands**
The Southern Association of Colleges and Schools Commission on Colleges (SACSCOC) does not differentiate between standards for assessment of hybrid, online, and face-to-face courses. Therefore, online and hybrid courses must meet the same standards as an equivalent face-to-face course. If an institution cannot assure that the standards for a hybrid or online course are equivalent or superior to those adopted for the same face-to-face course, the course is inappropriate for online delivery.

**State Authorization**
UTEP is committed to complying with rules and regulations regarding the operation of higher education institutions in every state in which it enrolls students. This practice, known as State Authorization, relates to all out-of-state activities ranging from fully online programs to experiential learning placements, or internships, - regardless of course modality - and many other activities in between. For certain courses/programs, including those in professional licensure fields, additional authorizations and/or disclosures may be required. UTEP Connect will review and complete authorizations for all UTEP programs with out-of-state activities. UTEP Connect can only do this with the cooperation of all units with out-of-state activities, including those without UTEP Connect programs. See the [Extended University](#) website for more information.
Student Privacy
Online student privacy must be maintained at all times by keeping grades secure in the learning management system. Grades must not be viewable to other members of the course. No student grades or information may be posted outside of secured systems any time during or after the semester.

If external tools (wikis, blogs, etc.) or recorded sessions are used, the faculty member must ensure that Family Educational Rights and Privacy Act (FERPA) requirements are met. In most cases, it is acceptable for faculty to ask students to create and comment on wikis and blogs. However, students should not be required to post information that is protected under FERPA (class schedule, for example). Faculty comments and grades on student work should never be made public. As a solution, faculty should inform students that their work may be public and provide students with information on making their wikis and blogs private.

Faculty cannot require students to reveal private information to the class and should respect students’ requests to not post information for class viewing. If a student requests to not share a personal photo or reveal one’s identity, for example, faculty should provide an alternative assignment with similar weight.

The Online Learning Student Privacy & Related Issues FAQ provided by UT System Online Education Task Force is an excellent resource for faculty and administrators regarding maintaining student privacy.

Accessibility
Section 508 of the American Disabilities Act (ADA) requires instructors to provide equal access to course materials for all students. The Center for Instructional Design (CID) assists faculty in making sure their online courses are accessible to all students. Online students requiring an accommodation should work with the Center for Accommodations and Support Services.

Intellectual Property
University rules pertaining to intellectual property can be found in Chapter 4 of the Handbook of Operating Procedures. UT System Board of Regents policies regarding intellectual property can be found in Section 90101.

Copyright of Course Materials
The TEACH Act (Technology, Education, and Copyright Harmonization) provides guidance for academic institutions relative to copyright regulations. Under the TEACH Act, it may be permissible to make some copyrighted materials available to students if they are:

- Directly related and integral to the course content
- Accessible only by students enrolled in the course
- Retained only for the duration of the class
- Does not exceed the length or amount displayed in a face-to-face class

Students should be made aware of the institution’s copyright policies, specifically that course content may subject be to copyright laws and protections.
Academic Administration

Online Course Development
Any course taught online for the first time must complete the full approval process before it can be placed on the semester schedule. Access and complete the following form: Online Course Development Proposal to begin the process

Due to the time and effort involved in ensuring course quality and accessibility, faculty should allow for at least four months development time before offering a new online course. All courses developed with the support of UTEP instructional designers will be developed under a Joint Creation and Ownership Agreement between UTEP and the responsible faculty member. Approximately two weeks prior to course start, a Course Quality Rubric (CQual) and Technical Review will be performed by CID, and feedback will be provided to the instructor. After the course review is completed, CID staff are removed from the Blackboard course shell to accommodate FERPA regulations.

Online Course Approval and Routing
The creation of new courses, independent of delivery format, is initiated at the academic department level and is subject to approval. (See Curriculum Changes.)

The approval process for online and hybrid courses varies depending on whether the course exists in the UTEP inventory of courses.

Conversion of existing courses occurs when courses are included in the UTEP catalog but have not previously been developed for online delivery. Proposals for the conversion of existing face-to-face or hybrid courses to online must originate from the responsible faculty member and be approved by the department chair, college dean, and the Vice President for Academic Affairs. The proposal is then reviewed by the CID and Extended University to determine the production schedule.

Special topics courses will be treated as new courses when the topic of the course changes, making them subject to the online course approval process.

New online courses must first be approved through the standard curriculum process. Proposals to develop the new course online must originate from the responsible faculty member and be approved by the department chair, college dean, and the Vice President for Academic Affairs. The proposal is then reviewed by the CID and Extended University to determine the production schedule. Production will not begin until the course has received its final curricular approval.

Online Program Approval and Routing
The process for online program approvals varies depending on whether the program already exists in the UTEP catalog. Prior to developing an online program, faculty should participate in a course-mapping workshop.

Conversion of existing programs occurs when programs are included in the UTEP catalog but have not been developed for online delivery. Proposals for the conversion of an existing program to online or hybrid delivery must originate from the department
chair, through the college dean, and be approved by the Provost in consultation with the Dean of Extended University. If a program requires curricular modifications, it must go through the appropriate approval process at the college and university levels. The UTEP Connect memorandum of understanding must be signed before course development, marketing, or recruitment begins. Program directors should also contact the Director of Academic Reports and Curriculum to facilitate notification to the Texas Higher Education Coordinating Board at least 90 days prior to its start date.

**New online programs** do not exist in the UTEP catalog. These must be approved through the standard curriculum process. Once reaching final approval, notice must be sent to Extended University for consultation and scheduling of development. The UTEP Connect memorandum of understanding must be signed before course development, marketing, or recruitment begins.

Please see [Curriculum Change Procedures](#) for more information.

**Academic Calendar**
Online courses adhere as closely as possible to the traditional academic calendar. Most run for 7, 8, 14, or 16 weeks in the fall and spring semesters with additional parts of term in the summer. The academic calendar is available at the [Registration and Records website](#).

**Faculty Guidelines**

**Online Faculty**
Faculty who teach online courses are appointed and credentialed by their academic program and college/school.

**Faculty Credentialing**
Accreditation agencies require that faculty are well prepared to teach hybrid and online courses. Through CID and CFLD, UTEP provides instruction in effective hybrid and online design and teaching that meets SACSCOC accreditation standards. This training includes skill enhancement in instructional design and pedagogy, course management strategies, assessment of hybrid and online course effectiveness, online course management system tools, and policies and guidelines for academic integrity. Instructors should also apply the Texas Higher Education Coordinating Board's (THECB) [Principles of Good Practice](#) to ensure that course assessments achieve the necessary learning outcomes.

To begin course development and be credentialed for online course instruction, faculty members must complete both Blackboard Self-Paced Course, offered through Blackboard Central, and the Teaching Online Academy, offered through CID. Both are offered online. The Blackboard Self-Paced Course may be taken at any time. The Teaching Online Academy is offered multiple times a year. Additional assistance can be provided by CID and Blackboard Central as needed. Multiple workshops are also provided throughout the fall and spring semesters. Faculty are also encouraged to enroll in the Hybrid Academy prior to developing and teaching a hybrid course.
Faculty Responsibility
Faculty are responsible for establishing the course learning objectives and the course curriculum, assessing the learning outcomes, providing timely responses to students, and submitting final grades.

Class Size
Maximum class size is determined by the academic program delivering the course; however, student demand may require maximum class size to be flexible. Depending on the department, graduate teaching assistants or coaches (via a third-party resource, Instructional Connections) may be available to assist with course responsibilities as determined by the instructor. If Instructional Connections coaches are desired, the request should be made through Extended University no fewer than two weeks prior to the course start date. The request for coaches can be found on the UTEP Connect website.

Online Office Hours and Student Expectations for Response
As indicated in the UTEP Handbook of Operating Procedures (HoOP), faculty should post a schedule of regular office hours that is convenient to students and meets departmental requirements. Faculty are expected to be available at the times indicated. A reasonable guideline for minimum office hours is 0.7 scheduled office hours per each semester credit hour for which the faculty is formally responsible. For online classes, faculty should make themselves available to students via phone, email, chat, videoconferencing tools, or other technologies.

Faculty must clearly indicate in their course materials the expectation for response to student requests. Generally speaking, faculty should respond to student emails and questions within 24 to 72 hours.

Academic Integrity of Online Courses
Online and face-to-face courses should have the same learning outcomes, course descriptions, and expectations. Faculty should ensure that the quality and rigor of an online course is no less than that of its face-to-face equivalent.

Course/Faculty Evaluation
Students evaluate online courses using the course evaluation procedures in effect for campus-based courses. Student evaluations are completed online for all courses. Results are made available to the instructor via myutep. Additionally, faculty are encouraged to reach out to students mid-semester to gain feedback in the form of Blackboard’s anonymous surveys and low-stakes discussion boards.

Student Grade Inquiries
It is best practice to address grade inquires via Blackboard’s course messages or via Zoom web conference. To maintain student privacy, discussing grades via email or phone is not recommended.

Student Drops and Withdrawals
Online courses follow the same regulations as face-to-face courses regarding faculty and student initiated course drops and withdrawals. Deadlines for both can be found on academic calendar on the UTEP Registration and Records website.
Faculty Compensation
Full-time faculty teaching online courses receive no additional compensation for courses taught as part of their regular load. In the case of a full-time faculty teaching the course as an overload, additional payment within university policy may be requested. Part-time faculty teaching an online class will be compensated at the same rate as a face-to-face course. Faculty developing a course for a fully online degree program may be eligible for a course development stipend upon completion, with approval of the program chair.

Use of Student Work
When faculty wish to use student work for any purpose outside of course or program assessment such as research or for pedagogical purposes, they must request the students' permission. To use student work used in any research-related project (professional/academic presentations, publications, posters, etc.), faculty should follow the Institutional Review Board (IRB) process for human subject research including requesting that students complete an IRB approved consent form. When seeking to use student work for publication or pedagogical reasons (e.g., examples of effective projects), the Student Authorization and Waiver for Release of Education Records for Publication of Student Authored Materials form should be completed.

Ownership of Educational Materials
The Joint Creation and Authorship Agreement must be signed by the faculty member developing the course and a representative before a new online course is scheduled. To access the form, visit the Center for Instructional Design.

Student Guidelines

Student Support
Students enrolled in online courses and programs are provided access to student services available at UTEP. This includes, but is not limited to: the library, the University Writing Center, the UTEP Bookstore, the Center for Accommodations and Support Services, Career Services, and the Miner Learning Center.

Questions regarding Blackboard, UTEP email, and other technological issues can be sent to the UTEP Helpdesk via phone, email, or chat.

State Authorization
In order to comply with federal requirements regarding state authorization, UTEP must know where its students are located. All students are expected to maintain and update their current location and mailing address within UTEP’s student information system.

Academic Integrity and Scholastic Dishonesty
Online students are held to the same academic integrity policies as face-to-face students. Scholastic dishonesty includes cheating, plagiarism, and collusion. Faculty should take measures to deter cheating as much as possible (unique assignments, proctored exams, random test or quiz questions, plagiarism checkers, etc.). UTEP’s judicial process will be followed when academic dishonesty is suspected. In this case, faculty are to collect evidence and submit it to the Office of Student Conduct and Conflict Resolution (OSCCR). Faculty may not assign penalties (in the form of reduced points or
grades) for inappropriate academic behavior. OSCCR will investigate the charge, determine the appropriate course of action and notify the student and faculty.

**Student Orientation**
The [Blackboard Student Orientation](#) is available on the CID website for all students. Online students are strongly encouraged to access the orientation within the first semester of coursework.

**Class Attendance**
Students are expected to attend their online class regularly by participating in activities such as submitting assignments, engaging in discussion boards, completing exams, attending online chats, and so on. Simply logging into the course does not count as attendance.

**Other Course Providers**
Online courses offered by other UT System institutions are available to students through [Finish@UT](#). To enroll in one of these courses, students must complete an online Registration Request using the Texas Information System (TIS). Students who enroll in these courses are subject to the host university’s deadlines, academic calendar, tuition and fee rates, and policies, which may be different from those at UTEP.

**Online Student Complaints**
UTEP’s policies and procedures for handling student academic and non-academic complaints are applicable to all students, including those enrolled in distance education programs and courses. Students with complaints about distance education delivered by UTEP Connect should follow the process described in the [UTEP Undergraduate and Graduate Catalogs](#) and UTEP’s Handbook of Operating Procedures.

If an issue cannot be resolved internally/locally, a student may also file a complaint with the designated agency in the state where he or she is receiving instruction. A complaint may also be filed with UTEP’s accrediting agency. Students located within a state with a State Authorization Reciprocity Agreement (SARA) may file a complaint through the Texas SARA portal. More information including information about various state agencies can be found on the [UTEP Connect website](#).

**Hybrid and Online Course Delivery**

**Learning Management System**
All hybrid and online courses must be delivered via Blackboard, the learning management system (LMS) supported by UTEP. To ensure integrity of the courses, at least 90% of the course content must reside within the LMS and be accessible only via secure login and password unique to each UTEP student and employee.

**Course Quality**
In accordance with the Texas Higher Education Coordinating Board's ([THECB](#)) Principles of Good Practice and SACSCOC accreditation standards, the academic department delivering hybrid and online courses and programs has final responsibility for ensuring pedagogical quality.
Hybrid and online courses and programs may be subject to assessment and program reviews as established by the Office of the Provost and Vice President for Academic Affairs.

**Student Authentication**
The SACSCOC Distance and Correspondence Education Policy Statement requires that "institutions demonstrate that the student who registers in a distance or correspondence course or program is the same student who participates in and completes the course or program and receives the credit by verifying the identity of a student who participates in class or coursework by using, at the option of the institution, methods such as 1) a secure login and pass code 2) proctored examinations and 3) new or other technologies and practices that are effective in verifying student identification."

Students gain access to Blackboard, through which all online courses are conducted, by entering their UTEP username and password. Faculty are thus encouraged to use at least one additional process to verify that students participating in online courses are the same as the students enrolled in the course. The faculty and/or academic program should identify this process. The verification requirement must be clearly stated in the syllabus or other course documents, and according to SACSCOC, if faculty members require a student verification process that incurs a monetary charge, that information must be conveyed to students at the time of registration or enrollment (i.e., posted in a syllabus made available prior to enrollment).

Options for student verification include:

- Verification of approved photo ID through a web cam
- Proctoring of exams or other projects through a web cam
- Synchronous or asynchronous activities requiring an approved photo ID
- Field or clinical activities requiring a photo ID at arrival
- Other process defined by the faculty or program

Photo IDs may include: driver’s license, military ID, passport, government-issued identification, or a Miner Gold Card for on-campus students.

The CID is available to assist faculty with the selection of the verification tool and the implementation of the process.
