

## Research Development & Team Science

As a unit under UTEP Research & Innovation, the Research Development team helps to facilitate interdisciplinary research and team science initiatives at UTEP. Whether you're looking to collaborate with another department or another college, our team can promote connections and synergy to help ensure smooth project and proposal execution.

### Our Services

#### Strategic Planning and Facilitation

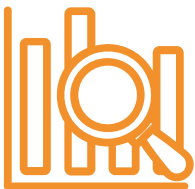

- Assist research teams with strategic planning and offer facilitation services
- Enhance team dynamics and productivity to develop cohesive, high-performing and sustainable research teams
- Develop comprehensive agendas that promote effective collaboration and engagement.
- Assist in creating and maintaining new research teams

#### Workshops for Ideation and Seminars

- Organize and host comprehensive workshops and seminars to unite faculty around shared research interests
- Establish new interdisciplinary research teams and promote collaboration across disciplines, colleges, and sectors
- Provide innovative and interactive activity ideas tailored to team-building goals

#### Statistical Analyses

- Sourcing funding opportunities
- Assisting with large-scale interdisciplinary institutional opportunities
- Proposal development, planning, and strategy
