

Texas Genomic Act (Texas H.B. 130)
Attestation Form

I understand the purpose of Texas H.B. 130 is to ensure that medical facilities, research facilities, companies, or non-profit organizations subject to the Act do not provide foreign adversaries with access to the genetic information of residents of the state of Texas. The Act explicitly prohibits the use of genome sequencers or related software produced by or affiliated with foreign adversaries. This includes state-owned enterprises, companies or nonprofits domiciled in foreign adversary countries, or their subsidiaries and affiliates.

Requester's Name:

Project Title:

Project ID (If applicable):

Company Information

- 1. Name of the Company:
2. Address (street, state, country):
3. Website Address:

Are the samples being analyzed human? [] Yes [] No

- [] By checking this box and signing & dating below, I certify the following:
- I will contact ExportControl@utep.edu prior to the use or purchase of nucleic acid sequencers or software, while conducting research relating to human tissue.
- I will contact ExportControl@utep.edu prior to entering into a service agreement or contract relating to nucleic acid sequencing of samples taken from human tissue.
