Comprehensive Exam B - AI Checklist Cover Page

Use of AI tools in preparing this proposal must be disclosed using the checklist below (mark X under "Yes" or "No"). There are no categories of AI use that disqualify a proposal from being submitted to the committee. However, the oral examination will directly probe the scientific reasoning behind the proposed aims, hypotheses, experimental design, and anticipated outcomes. The student is expected to be able to explain, defend, and critically evaluate every element of their proposal, including its weaknesses, as if they prepared the proposal entirely.
