Are you a current high school student? Not sure about college and which path to take? Do you enjoy the outdoors, computers, the laboratory environment, mathematics, chemistry, biology, world travel, and/or are just curious about the Earth, planets, and the environment? If you answered yes to any question, we have a great summer experience for you!

As a geoscientist, you can make a huge impact on the world around you! Geoscientists seek a greater understanding of Earth, protect the planet, predict/assess geological disasters, and find water, minerals, and energy resources. The **PATHWAYS to Geosciences High School Summer Camp** at the University of Texas at El Paso is an opportunity for you to be exposed to the Geosciences in preparation for your college experience. Through hands-on activities, we will introduce you to different Earth science fields and their relationship with your high school science classes. This is an opportunity to get paid for learning about everything the Department of Earth, Environmental and Resource Sciences has to offer you while interacting with other high school students and UTEP students and professors.

If you are interested or have questions regarding this program, please obtain an application from your science teacher, or email the Pathways coordinator at azamora3@utep.edu.

Who? YOU!!!

**What?** UTEP Pathways to Geosciences High School Summer Camp 2021

**When?** Monday- Friday 8:30AM-1:00PM  
Camp 2: June 28th - July 2nd, 2021.

**Where?** UTEP’s Department of Earth, Environmental and Resource Sciences

**Why?** Explore the possibilities of an exciting career in Geosciences!!
