General Info

- FOH is typically set side by side to maximize floor space.
- Rule of thumb for fork lifts - 1 fork per set of loaders, 1 for bottom of tunnel, 1 to push gear up tunnel for load out is the recommended method. (example: 12 loaders - 3 forks, 1 for tunnel push,
1 for bottom of tunnel to fork off stage = 5 Total
- **No ADA access to floor other than from tunnel, so all ADA patrons must enter via load in tunnel and shows must maintain a minimum of 4' ADA clearance on both sides of stage.**
