

WHAT IS RESPONDUS LOCKDOWN BROWSER AND MONITOR?

Respond us LockDown Browser is a test taking browser that prevents you from printing, copying, going to another URL, or accessing other applications during a test.

Respondus Monitor, when enabled, requires students to use a webcam and microphone with LockDown Browser. As soon as the exam is complete, the instructor can view the recordings from the student's test session.

! If a Blackboard test requires Respond us LockDown Browser, students will not be able to take the test with a standard web browser. This should only be used for taking Blackboard tests.

INSTALL LOCKDOWN BROWSER

To setup and begin an exam with Respondus LockDown Browser, follow the steps below.

STEP 1:

After logging in to Blackboard, click the **Student Services & Internships** tab.

STEP 2:

In the Student Bookmarks module, click on the **Download LockDown Browser** link.

STEP 3:

In page that opens, click **Install** and follow the on screen instructions to complete the installation.

BEGIN EXAM

STEP 1:

Click Lockdown Browser icon on computer.

STEP 2:

If prompted to close a blocked program, choose **yes**.

STEP 3:

Enter UTEP login information. Navigate and begin exam in Blackboard course.

! If the instructor requires a webcam or password, a startup sequence guide will begin.
