UTEP Secure
iPhone Setup

1. From the home screen, go to Settings.

2. Click on Wi-Fi and then click on utepsecure.

3. Once you have selected utepsecure you will be prompted for a Username and Password.

4. Once you have entered the credentials correctly and press Join you will receive a prompt asking you to trust a certificate. You must trust the certificate to join utepsecure. Click on Trust to authenticate automatically whenever you connect to utepsecure throughout campus.

NOTE: It is recommended you Forget utepwl1 so your device will prefer utepsecure as its primary wireless network.
