

Download the software from the UTEP [Semichem AMPAC information site](#). The download link is located under the **Cost** section. You will be required to sign in with your UTEP credentials before you are allowed to download the software and the license for AMPAC.

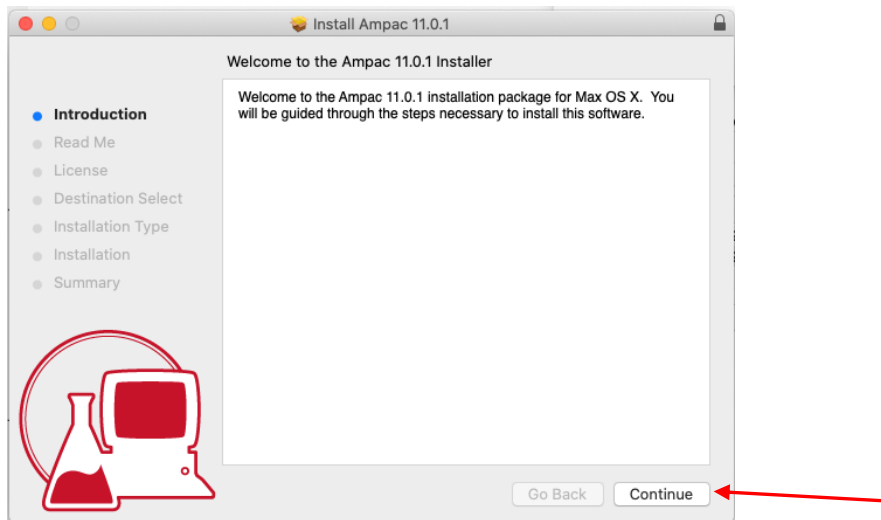

Download both the installation files and the Ampac license key file.

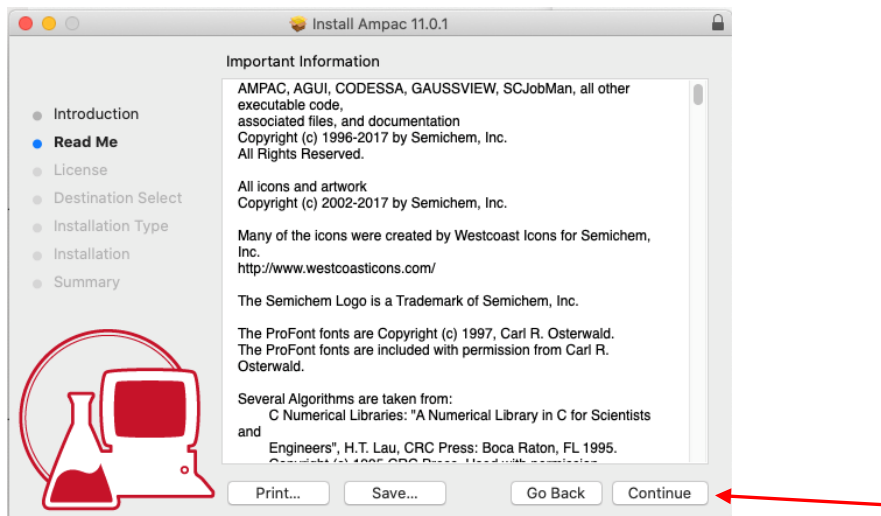

To start the installation launch the **Ampac-11_0_1-MacOSX.pkg** installer.

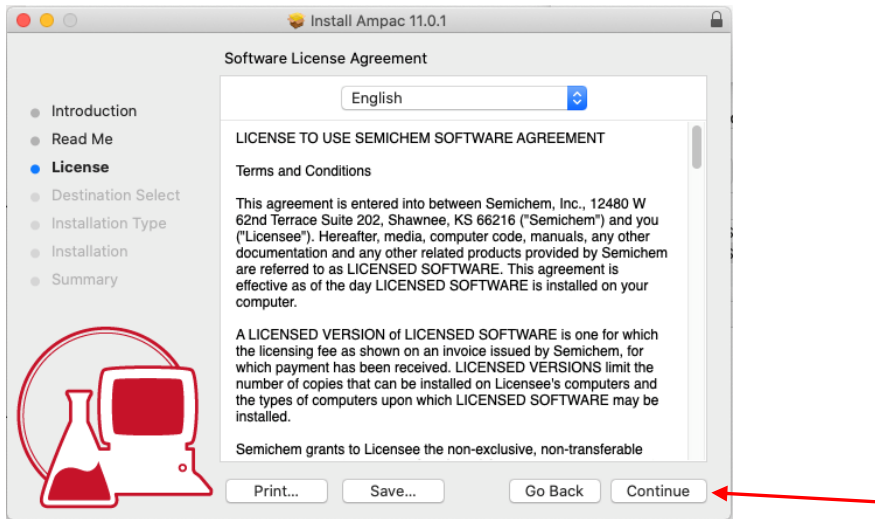

Click **Continue**

Click **Continue**

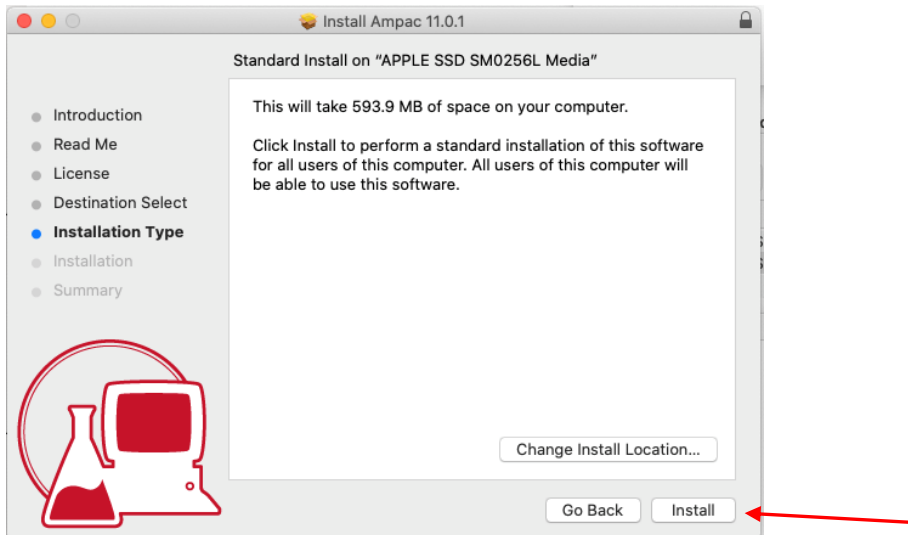

Click Continue

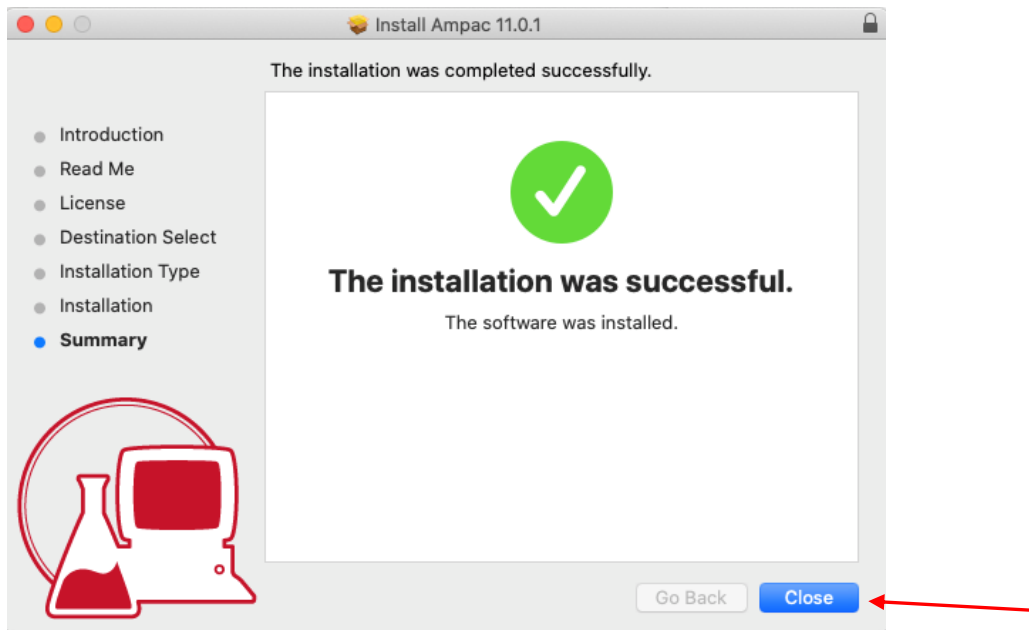

Click Agree

Click Install

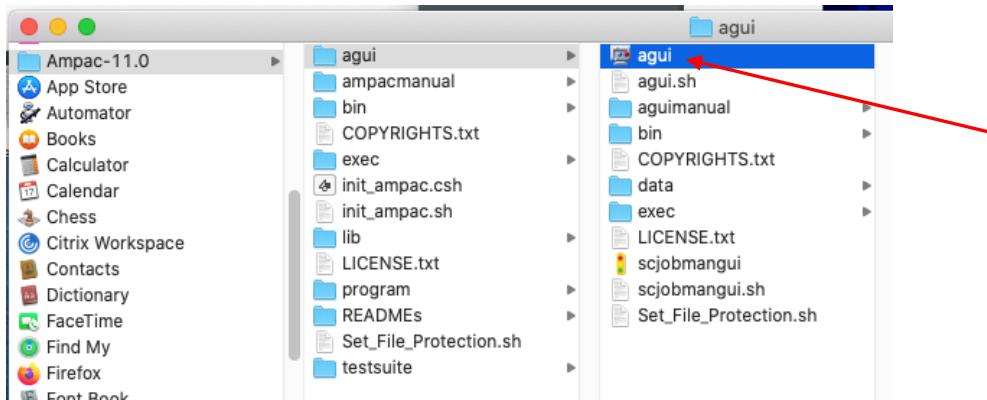

Click **Close**

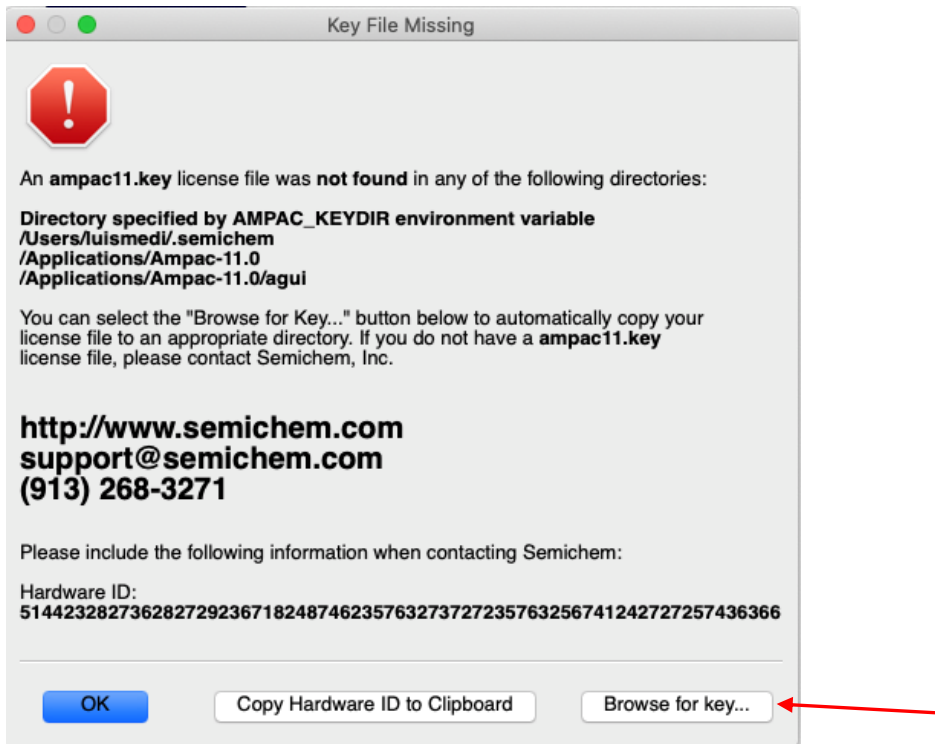

Go to your **Applications** folder and look for the **Ampac - 11.0** folder

On the **Ampac-11.0** folder look for the **agui** folder and then launch the **agui** app.

An error message window will appear asking for the license key. Click on the **Browse for key** button and look for the license key file which was downloaded earlier from the Semichen Ampac information page.

Select the Ampac license key file and click **Open**. After this you copy of Ampac will be licensed.
